MIND

CONTROL

A TRIBUTE TO

Dr. Rauni-Leena

LUUKANEN-KILDE

Dr. Rauni-Leena Luukanen-Kilde (1939 - 2015)

*Public Health and Tropical Medicine Physician
and Social Activist.*

Born in Finland, November 15, 1939

Lived in Norway from 1991

'Died' in Finland, February 8, 2015

Bachelor of Medicine 1964, Medical Doctor 1967, University of Turku, Finland 1964.
Diploma in Tropical Medicine, Karolinska Institute, Stockholm 1970.
Certificate of Social Medicine, Nordic School of Public Health, Sweden, 1972.
Diploma in Public Health (National Board of Health), Finland, 1974.
Diploma in Health Administration, 1980. Intern and resident University Hospital at Turku and regional Hospital, Salo.
Member of Staff at various hospitals, 1969-1975.
Chief Physician, Pelkosenniemi-Savukoski Hospital, 1970-1972.
Physician at United Christian Hospital, Lahore, Pakistan, 1968.

Acting Director Environmental Health and Health Education, Finland, 1978.
Chief Medical Officer, Lapland, 1975-1987.
Chief Medical Advisor, International Red Cross in Malaysia and Indonesia, 1979.
Chief delegate of Government of Finland, World Health Organization, Tropical Medicine, Geneva, Switzerland, 1978-1979.

Member of Committee for Arctic Medical Research, Nordic Council, 1981-84.
Member of Advisory Board for International Association for Near-death studies, Connecticut, USA, 1983.
Vice-President Academy for Clinical Close Encounter Therapies, California, USA.

International Bestseller: Author of "There is No Death" 1982, Literary Award 1983.

Member of Security Council, Lapland, 1975-1987.
Commodore, President Sailing Club, Lapland, 1976-1977.
Member of the Board of Red Cross, Lapland, 1965-1979.
President, Nursing College, Lapland, 1976-1987.
Recipient Travel Grants, National Board of Health, Finland, 1979- 1981.
Anniversary Medal, United Nations, Parapsychology Society, 1992.
Medal with Gold for Civil Defence, Finland, 1991.
Member of American Society for Psychical Research, 1983.
President and Founder of Parapsychological Association of Lapland, 1981-1986.
Member of the New York Academy of Sciences, 1992-1994.

Speaks 6 languages.
Honorary diploma from CAHRA (Citizens Against Human Rights Abuse), USA, 1999. Member of the Finnish Medical Association.
Member of the board of EUCACH (EU Coalition Against Covert Harassment) 2013 until her death, 2015.

*(Extract: Who is Who - in the World, - in Science and Engineering,
- in Medicine and Health Care)*

MIND CONTROL

Lecture by Dr. Rauni Kilde

27th June, 2009, Switzerland, AZK

Dear Friends,

What is the biggest secret in the world? Have you ever thought about it?

It is to be a human being on this planet earth.

What is a human being?

Many of us, even doctors forget, that our body is 70 % water and our brain is 87 % water. So what holds us together? **ENERGY!**

Energy according to Einstein never disappears but only changes its form. Everything in the world is energy. It is this table. It is us. It's anything. Everything is vibration, frequencies and energy.

And what is mind control?

Mind control means, that there are devices that can take over your brain. They can make you mad. They can make you religious. They can make you homosexual. They can change everything in you.

And what are these devices?

It is the military-industrial complex which has developed them, already in about fifty/sixty years. But in a conference of Non-lethal weapon in Ettlingen by Karlsruhe in May 2009 an American Colonial said that the first mind control device was already developed 1801.

Generally the information that is given in the mass media to the public is at least half a century old. When you hear about new academic findings, they are always half a century old. But they are always presented and represented as new technology.

So what is the purpose of mind control taking over your body, your brain, your behaviour?

It is to disrupt memory. It is to discredit people through aberrant behaviour or to their sex patterns and to elicit information.

And what is the goal of mind control?

To program any individual, you and me and anybody; and to carry out any mission of espionage or assassination against your will. And to control the absolute behaviour and thought patterns of the individual.

The guise of National Security is used as an excuse. And this is an excuse for illegal activities to cover up all the deeds to manipulate the opinions of individuals. It is done with electromagnetic fields. It is also done with various drugs, and it is done with psychological warfare.

Part of the mind control is to survey you 24 hours 365 days a year. Both physically and with electronic means. You can be filmed in your own home through the walls, and they are using usually your neighbours, who have been recruited.

You may think a friend has been a friend for fifty years ... he can be recruited. You don't know THEIR methods, and I come later to who THEY are.

The drug-related mind control projects were under the direction of CIA and US Navy. Already in 1952 CIA had a programme of implanting people their teeth and their brain with electrons for surveillance and control.

So the military and secret services research is always at least two generations ahead of academic research.

To come back to the question what is a human being. There has been an interesting survey already in 1985 about USA and European countries and the psychic phenomena of human beings. In western Europe totally 32 % claimed they had telepathic contacts, 20 % claimed clairvoyance and 28 % of Europeans claimed to have contact with the energy of the dead.

In USA the figures were much higher: 58 % telepathy, 24 % clairvoyance and 27 % contact with the energy of the dead. And a very strange, surprising figure came from Iceland. 41 % of Icelanders claim contact with the dead.

Now you can't say that almost half of Icelanders are schizophrenic, can you. Because that is what the Diagnostic and Statistical Manual of Mental Disorders, the psychiatry's bible, claimed until 1994.

Now, when we think of mind control methods – It is done by satellites and shuttles. For instance the space shuttles were tested for mind control and weather engineering.

Defence News noted during a check out of the laser machine pulses emanating from Discovery at the rate of 10 beams/sec. (They were sending from the laser machine which was in the space shuttle pulses of 10 beams/sec.)

And those 10 pulses/sec is within the frequency in the human brains alpha wave branch and this can be called mind-zapping. So motion, emotion and behaviour can be directed by electronic forces, and human beings can be controlled like robots.

The European parliament has warned of these dangers already in January, 1999. Awareness of the existence of mind control technology and its dangers and possible misuse, it seems to be more prevalent in Europe than elsewhere.

The European parliament resolution on the environment, security and foreign policy includes these articles:

Article 26 calls on the European Union to seek to have the new 'non-lethal' weapon technology (They are, by the way, lethal but they call it non-lethal.) and the development of new arms strategies also covered and regulated by international conventions.

Article 27 says to HAARP (High Frequency Active Auroral Research Project) in Alaska – officially the University of Alaska is investigating ionosphere, but actually it is a project of US Navy and Air Force – there is a global concern for legal, ecological and ethical implications.

Article 30 calls for an international convention introducing a global ban on all research and development of weapons which might enable any form of manipulation of human beings.

The United States, of course, ignores these resolutions, and it does not obey international laws.

Also, in Norway, many may not know it; we have a mini HAARP at the northernmost tip of Norway, 50 kilometres from the Russian border. And of course also used for mind control just as HAARP. It is not just to investigate the ionosphere, the atmosphere.

***European parliament, Report on the environment, security
and foreign policy, Committee on Foreign Affairs,
Security and Defence Policy***

14th January, 1999 (Excerpt)

Legal aspects of military activities

26. Calls on the European Union to seek to have the new 'non-lethal' weapons technology and the development of new arms strategies also covered and regulated by international conventions;

27. Considers HAARP (High Frequency Active Auroral Research Project) by virtue of its farreaching impact on the environment to be a global concern and calls for its legal, ecological and ethical implications to be examined by an international independent body before any further research and testing; regrets the repeated refusal of the United States Administration to send anyone in person to give evidence to the public hearing or any subsequent meeting held by its competent committee into the environmental and public risks connected with the high Frequency Active Auroral Research Project (HAARP) programme currently being funded in Alaska;

28. Requests the Scientific and Technological Options Assessment (STOA) Panel to agree to examine the scientific and technical evidence provided in all existing research findings on HAARP to assess the exact nature and degree of risk that HAARP poses both to the local and global environment and to public health generally;

29. Calls on the Commission, in collaboration with the governments of Sweden, Finland, Norway and the Russian Federation, to examine the environmental and public health implications of the HAARP programme for Arctic Europe and to report back to Parliament with its findings;

30. Calls in particular for an international convention for a global ban on all research and development, whether military or civilian, which seeks to apply knowledge of the chemical, electrical, sound vibration or other functioning of the human brain to the development of weapons which might enable any form of manipulation of human beings, including a ban on any actual or possible deployment of such systems;

Mind control subliminal messages are carried out on radio frequency broadcasts. They can also be used through your telephone lines and electrical lines in your home.

They use different frequencies for different results. For instance 15 Hertz are used against the auditory cortex and that is sound which by passes the ears. You don't need ears to hear. You need the brain. 25 Hertz are used against the visual cortex. Images for the brain without your eyes. 20 Hertz are directed to your thought centre imposes subconscious thoughts which you think are your own.

It is very dangerous actually to reveal information about mind control because that is the biggest secret besides who is the human being.

I've been to international conferences trying to give information on mind control. When I once in Finland for a psychiatric conference used the word 'Mind Control' as the title, it was rejected. Then I changed the title and gave it in as 'Neuro-electromagnetic Telecommunication and Cybernetics' at the International Medicine conference, it was accepted.

Isn't that strange. It's a play of words. When you know what words to use you get through and if you use the false words you don't.

Probably this report, the year 2000, was the first one in a scientific conference. I got it through only because I knew the Military Medical General of Finland and he did not know anything about mind control.

Objectives of Neuro-electromagnetic Telecommunication are behaviour modification and influencing of bodily and mental functions and emotions remotely through satellites and through data (computers). Astronauts and Cosmonauts were always and are implanted with microchips, so that all their body functions, feelings, dreams and subconscious could be seen on earth.

Today the speed of super computers as I know it is 180 Trillion bits/sec. I'm sure, they are much, much faster. But that is the figure that has been revealed. And what is revealed, remember, is fifty years old. Our brain speed is 5.000 bits/sec, so we are no match to any computer.

If you think that a couple of years ago in California a super computer was asking for Human Rights, to be accepted as a human. (Of course it was much more intelligent than the judges or anybody around.) The request was rejected. But now the latest information was it is trying again, this conscious so-called conscious computer to ask for Human Rights in Florida.

When you think of our future and our children this technology has to be stopped somehow. Otherwise, the next generation is 100 % biological robots listening to the orders from the computers.

We be very surprised to see reports all over the world about the school shootings and shootings at shopping centres; because they are done through young men with mind control. They are using technology, so called Delta programming, whereby the shooter kills himself after the killings.

Now – who is behind this evilness?

In Ettlingen, in the 'non-lethal' weapons conference, an American Colonel gave a report and said who are THEY.

We say ... they do this; they kill, they are surveilling ... **Who are they?**

He showed it like this, a square. In the middle was the New World Order, on the right side was the Star of David with an Illuminati sign. On the other side were CIA, FBI and British Intelligence services. **THEY ARE THEM!**

And maybe you can say they have always been there – and always will, if nobody stops them. FBI former director J. Edgar Hoover, who was the director in FBI for 48 years, said the individual is handicapped by coming Face to Face with a conspiracy so monstrous he cannot believe it exists.

And in 1913 already President Woodrow Wilson said: “Some of the biggest men in the United States, in the field of commerce and manufacture, are afraid of something. They know that there is a power somewhere so organized, so subtle, so watchful, so interlocked, so complete, so pervasive that they had better not speak above their breath when they speak in condemnation of it.”

The electronic mind weapons are worst than atom bombs, because you can't see them. You can feel them in your body, but you can't prove they exist as a normal individual because they are used silently through the walls.

They use silent hypnosis. All of the sudden you think of something and you may not be aware the thought was induced to you.

All the governments in the western world deny their existence. But these weapons do cause illnesses like cancer, Alzheimer's and just about any other disease especially brain tumours, strokes and heart attacks.

Now in Norway they say every third person is going to die of cancer. Every third! In Oslo, there are already hundreds of young people under thirty who have Alzheimer's, Senility.

Of course that comes from mobile phones, but you can't prove it. Some kind of proof maybe is that: A friend of mine had a brain tumour operated successfully. She had an eight-year-old boy whom the father gave a mobile phone as a Christmas present. I said then "Are you crazy – your wife has had just a brain tumour, and you are giving the child a mobile." The boy listened to what I said and guess what he said. He said: "There is only one boy in our class doesn't have a mobile, and he is the son of a director in Nokia." So that is not a scientific proof but it is proof enough for me, anyway.

Also when we think over human being, so we don't differ so much from the Americans or Russians or Chinese. But the safety standards for popular exposure (RF Elektromagnetic Fields) are very different in different countries. In eastern block countries and in the Soviet Union it was only 10 m_T/cm^3 . In Australia it is 200 m_T/cm^3 . In UK and in USA it is 10.000 m_T/cm^3 .

Now, why is this?

You can answer it by asking who controls the US and UK to that extend.

The National Security Agency in the USA through its Echelon satellites they can harass people, writers and whistleblowers especially, through the satellites worldwide. They can spot you anywhere. They know exactly that I'm here. They hear every word that I say and if they want, they can just send a beam and I become unconscious or die.

They have killed some of my friends who knew too much as I do. They killed both my parents, trying to shut me up. But I told my mother, when she asked "Rauni stop, please." "If I stop, they won't and I feel it is my mission to expose as much information as I can."

But it is not easy. My house has been robbed over 300 times and the police does nothing. The police help them. I've been hit unconsciously, taking by ambulance to the hospital. I've been poisoned through the air ducts in my own home, and I'm surveilled 24 hours, 365 days.

But there is something that they don't know. When I went to the police chief, then they started harassing me over 10 years ago, I said: "I come from Finland, and 200 Million Russians in the winter war could not take four Million Fins. This is my winter war. I'm not afraid of you."

Because the thing is, then you know that there is no death, you can't be afraid of anything.

And again it comes to the question – what is a human being?

I came to this path through Parapsychology, Ufology and now Mind Control. And I started experimenting than I was reading American literature, already in the Fifties. I've read that a person, actually any person can release his or her energy body away from the physical body.

At that time I was Chief Medical Officer of Lapland. I lay in my bed, naked with my legs cocked, and I started concentrating on my energy, trying to release it from the body. And all of the sudden I started vibrating as if there were radio waves coming from my feet towards my brain. Then there was a short black out and an exact copy looking like skim milk was hovering about my physical, also having the legs cocked.

So I started watching from above my physical body. I saw I was breathing very, very slowly. I worked also as an anaesthetist, so I can count 60 seconds. I started counting. My body was breathing ten times a minute. Twenty times a minute is normal. And then I put my astral, my energy body, down and with the hand of the astral body I took my pulse of the physical like a doctor. And the pulse was 32 beats/min – it should be 60.

So I got scared and, like men in war ask for their mothers, I said in my thoughts “Oh mother help me.” But the thought was in my energy body, not in the physical. The physical body was like a corpse. And then I had said “Mother help me”, I suddenly was about 800 kilometres south in Helsinki, the capital of Finland. And I saw my mother in the living room with my niece. They were talking, but I couldn’t hear the words. Anyway, I knew it was not important.

So then I thought “What is happening? Where is my sister?” – because my mother is babysitting my niece. And immediately my consciousness was transferred to a cocktail party and there I saw my sister flirting with a family friend. I looked around, I couldn’t see her husband. Then I wanted to go home, 800 kilometres to Lapland. And I did – in a second. And there I was again, hovering over my physical body which was laying there all the time.

While I was making this astral trip, I was just like a ball of light.

Then I was hovering above my body I started feeling sick, like sea sickness. I was afraid that I would maybe vomit and thought, if I vomit over this body maybe I would suffocate.

So then I just concentrated that I want to get back – and zap, I was back in my body which was still and stiff.

The next morning I called my parents. My father took the phone. I asked him, “What did my mother do at 8 pm last night.” And he said, “I can’t tell you because it is a Christmas gift for you.” And I told him I had seen my mother was sewing a long, green dress with flowers.

So everything that I had seen I could verify. My father said to me, when I told him what had happened, “Don’t ever tell anybody. They think you are crazy.”

Then I called my sister. I said, “What were you doing last night?” She said she could not remember. “Where was your husband?” I asked. “He was on a business trip in middle Finland”, she answered. So I said: “You were on a cocktail party with Mr. X.” “Don’t interfere in my affairs,” she replied.

So again, it’s not a legal proof but it is a proof for me what shows that man is a mind, not a body. It’s like a car and a driver. We always concentrate on the car, on the body. Now, if the car crashes, the driver gets out and later maybe buys a new car, a new colour, a new model. That is exactly what happens to a human being when we so-called die.

We have reports from 30 years back about so-called Near Death Experiences. When you are in a car crash or you are in a surgery and your heart stops for a short period and your astral body, your energy body, gets out – this is called a Near Death Experience. You didn't die but almost died.

Everybody who has it, in whatever culture, they feel they are going through a dark tunnel towards the light. And according to their religion they meet someone. In Europe mostly we are Lutheran or Catholic, so you meet a figure looking like Jesus. If you are a Muslim, you see Mohammed. A Buddhist sees Buddha. And if you don't have any religion, you just see a light.

And that light tells you ... and think now what your answer would be because you are going to ask this question, some day ...

What have you done with your life?

And from the second you were born in this body to that moment you will leave the body everything reappears like a film. And in this moment, you judge yourself – nobody else.

And the judging is based on the questions: How much have you loved (unconsciously)? How much have you helped others? How much have you forgiven? Etc. ...

These are very different categories from what we are normally thinking about. It means nothing what your title is or who you are or what you have done; except mentally in a positive way to other people. And then you see your deceased family and friends who all might tell you: “Your time is not out, you have to go back.” And nobody, really nobody want to go back, but they have to because they haven’t completed their mission on this earth yet.

Someone may ask – what is my mission. How do I know it?

It's what ever you do trying to help other people. And I would say, one of the greatest missions on this earth is to be a housewife for the children.

And why is that?

Because a housewife, a mother only gives love. And that is the greatest mission on the whole planet here – to give a lot of Love.

And it is very strange people think always, when accidents happen, that if they had not taken that plane that crashed they wouldn't have died.

We don't take in consideration that, before we were born into this body of ours, all our biggest happenings of life here on earth we have accepted – for our lessons and learnings of our consciousness. Because consciousness is eternal.

Therefore, we can never die, and therefore we can be influenced also with mind control methods from outside. To protect ourselves from outside negative influence, number one is the awareness that this technology exist.

Because the mind, the energy of the people is the biggest power in the world.

Do you remember the Yugoslavian situation then NATO was bombing it for three days? Nothing happened until thousands and thousands of people went to the streets. Their energy changed the situation.

When you think of the circumstances, we have here – some people die young, some get out of their body but can't die, some become very old. It depends on the lessons and learnings that their circle has.

I will give you an example. I have been in deathly situations many, many times. For instance, I was in Ibiza and rented a motor bike, and thought I can drive like I did then I was fifteen. I put it on a full blast and instead of going straight, it went straight up in the air. And I start falling down and thought "That's it." But something strange happened. It stopped in the mid-air, according to the laws of physics this is impossible and made a ninety degree turn and fell down. I'm sure, some sort of positive energy interfered.

A similar situation happened to me in Lapland where I was inspecting a hospital. I was driving with 100 km/h as an elk jumped from the woods towards my car. He stood one meter up in front of me and I thought we are now going to collide together. It weighed four hundred to six hundred kilos. And then there came an invisible energy between the elk and my car and threw it back to the woods. It landed on four feet, was shaking and wondering what has happened and went off.

That just shows that you cannot die until your mission is over. Somebody always, always protects you. There are many other examples which shows that every one of us has the path to go. And that path, remember, you have accepted.

So when something negative happens, the first questions is: What do I learn about this?

I will tell you one more thing that taught me that obedience to the universe is very important. I was going to New York to listen to David Bohm at the American Society for Psychical Research. At this time I have started automatic writing. Automatic writing is when you go into trance and something, an energy, takes over your hand and your writing.

My deceased grandmother claimed to be the person who influences me in writing. And my writing said, "You are not going to go to New York." I thought, "Why not, I've paid the ticket." And the writing said, "You trying to change your destiny and right now it is not possible."

So, what happened: On the 9th of March 1995 I jumped into the car go skiing, a few days before I should go to New York. It was snowing and the road was slippery. A bus was driving behind me. Suddenly I started sliding, and the last thing I thought was, "I hope it doesn't crash me." And that was exactly what happened.

The bus driver behind me was a teacher with forty kids on board and had to make the decision to run over me or crash into the woods. Then I woke up after being unconscious for about half an hour, I saw a little entity (Approx. 80 centimetres) giving a Prana treatment to me, to my body.

I couldn't understand what he was doing and who he was. I had never seen a being like that. It looked like an E.T., an extraterrestrial. Then the ambulance came and picked me up, I told them, "Take this one too to the ambulance." They looked at me strangely and considered that I had hallucinations.

I was so badly hurt that I was sick for two years and of course I did not fly to New York.

So one can ask: Why did this happen?

I asked the automatic writing for a month and eventually I got an answer. The text said, "You still have not learned the lesson of obedience. You would have died if we hadn't interfered. We are giving you a new chance to do your life work."

So there are very, very strong energies in the universe, and we all can get help if we want to. We just have to ask. And if somebody is dying of cancer or whatever disease you can be sure that, even if that would be induced, it is in your destiny.

To sum it up – because there are many, many stories and I know many of you have such experiences. According to Gallup 67 % of the people in different countries have paranormal experiences of telepathy, clairvoyance and contact with the dead.

And to think of those who negatively try to destroy us.

The elite has plans to get rid of 2/3 of world population with electronic warfare, chemical warfare, psychological warfare.

The only way I think we can stop them, because none of us want our children to be robots for super computers and the elite; the only way to do it is to send Love and Light.

It's maybe very difficult sometimes when they harass you extensively, but I would urge all of you to send Love and Light – to them and to our planet Earth. At least one minute a day. One minute a day is not much.

And there are only two things, I want you to remember - forever: **There is no death and we are not alone in the universe – and Love and Light is the answer.**

Thank you.

MICROWAVE MIND CONTROL

Modern Torture and Control mechanisms
eliminating
Human Rights and Privacy

by Dr. Rauni Kilde, 1999

HELSINGIN SANOMAT, the largest newspaper in Scandinavia, wrote on September 9, 1999 issue that Scientific American magazine estimates that after the Millennium perhaps ALL people will be implanted with a 'DNA microchip'.

How many people realise what it actually means?

Total loss of privacy and total outside control of the person's physical body functions, mental, emotional and thought processes, including the implanted person's subconscious and dreams! **For the rest of his life!**

It sounds like science fiction but it is secret military and intelligence agencies' mind control technology, which has been experimented with for almost half a century. Totally without the knowledge of the general public and even the general academic population.

Supercomputers in Maryland, Israel and elsewhere with a speed of over 20 BILLION bits/sec can monitor millions of people simultaneously. In fact, the whole world population can be totally controlled by these secret brain-computer interactions, however unbelievable it sounds for the uninformed.

Human thought has a speed of 5,000 bits/sec and everyone understands that our brain cannot compete with supercomputers acting via satellites, implants, local facilities, scalar or other forms of biotelemetry.

Each brain has a unique set of bioelectric resonance/entrainment characteristics. Remote neural monitoring systems with supercomputers can send messages through an implanted person's nervous system and affect their performance in any way desired. They can of course be tracked and identified anywhere.

Neuro-electromagnetic involuntary human experimentation has been going on with the so-called 'vulnerable population' for about 50 years, in the name of 'science' or 'national security' in the worst Nazi-type testing, contrary to all human rights. Physical and psychological torture of mind control victims today is like the worst horror movies. Only, unlike the horror movies, it is true.

It happens today in the USA, Japan, and Europe. With few exceptions, the mass media suppresses all information about the entire topic.

Mind control technology in the USA is classified under 'non-lethal' weaponry. The name is totally misleading because the technology used IS lethal, but death comes slowly in the form of 'normal' illnesses, like cancer, leukaemia, heart attacks, Alzheimer's disease with loss of short term memory first. No wonder these illnesses have increased all over the world.

When the use of electromagnetic fields, extra-low (ELF) and ultra-low (ULF) frequencies and microwaves aimed deliberately at certain individuals, groups and even the general population to cause diseases, disorientation, chaos and physical and emotional pain breaks into the awareness of the general population, a public outcry is inevitable.

**European parliament, Report on the environment, security
and foreign policy, Committee on Foreign Affairs,
Security and Defence Policy**

14th January, 1999 (Excerpt)

'Non-lethal' weapons

So-called 'non-lethal' weapons are not a new type of weapon but have existed for many years in such forms as water cannons, rubber bullets and tear gas. However, at the present time, more and more advanced weapon techniques have been developed which are labelled non-lethal despite the fact that they can cause extensive damage and even result in invalidity or death.

Both material and antipersonnel technologies have been developed. One example is acoustic weapons which are capable of confusing and disorientating and thereby neutralising an enemy by producing a low level of sound, known as infra-sound. Other examples are adhesive foam and blinding lasers. Chemicals which discolour water can affect both agriculture and the population. With the aid of electromagnetic beams it is possible to knock out the enemy's computer, navigation and communication systems. Non-lethal weapons can also be used against a country's infrastructure and authorities, bring the railway system to a standstill or cause chaos in a country's financial world. What these weapons have in common is that they are intended to delay, obstruct and overcome a potential enemy at 'strategic level'.

The fact that these different types of weapon are all categorised as non-lethal is seriously misleading and deluding. The term 'non-lethal' is intended to portray these weapons as more humane than conventional weapons - but there are no humane weapons. The use of any type of weapon involves a risk of injury or death, which is of course the purpose of weapons. 'Non-lethal' weapons tend to be used at an early stage of a conflict and may actually serve as a catalyst for the conflict. The use of violence by soldiers and police may increase because the weapons appear to be less dangerous. The inherent risk is that these weapons reduce the threshold for the use of violence to settle conflicts.

The aim is to neutralise the enemy without sustained suffering and without fatalities. But how and against whom 'non-lethal' weapons are used is an important consideration in terms of the implications of these weapons. A weapon that can render a soldier harmless, may injure or even kill a child or an elderly person. The distance from which they are fired and in what quantity are other factors with a bearing on the effects of the weapon. By way of comparison, conventional weapons result in 'only' 25% mortality.

Non-lethal weapons are used as an effective aid in modern warfare, either independently or in conjunction with conventional weapons. For example, the USA used radiofrequent weapons in the Gulf War to knock out Iraq's energy system, despite not knowing the antipersonnel effects of RF weapons. Non-lethal weapons should, therefore, not be regarded as separate from a lethal system but rather as a component thereof. The development of non-lethal weapons increases both their options. The result is therefore greater use of force rather than the opposite. 'Non-lethal' weapons do not result in non-lethal conflicts.

As a wider range of non-lethal weapons are developed, the military, police and politicians become more and more interested in testing how they work. Non-lethal weapons must not be used as an instrument of political interference and dominance of the northern over the southern countries.

There is no effective legislation governing non-lethal weapons. Only a small number of non-lethal weapons and techniques can be banned through the interpretation of various arms control regulations, e.g. adhesive foam (which was used in Somalia and Bosnia). Certain types of laser (which blind people) have also been restricted in the Convention on Certain Conventional Weapons. Biological toxins (e.g. salmonella and other bacteria) are banned by the Biological Weapons Convention. Several of these weapons may have serious environmental implications. International law must therefore be strengthened to regulate the new weapons which are under constant development.

The International Red Cross Committee's Cyrus project could be used in the absence of other reliable international standards for non-lethal weapons. The Cyrus project has classified and established criteria for conventional weapons in relation to mortality, invalidity, necessary treatment, blood supply, etc. The European Union should pursue a policy to extend international conventions to cover new weapons technologies and the development of new arms strategies.

Who is behind a sinister plan to microchip and control and torture the general population?

The Patent Office of the U.S.A. has granted patents for purposes of mental monitoring and mind alteration.

Apparatus and method for remotely monitoring and altering brainwaves, methods for inducing mental, emotional and physical states of consciousness, in human beings. Method of and apparatus for desired states of consciousness are among some of them.

People who have been implanted, involuntarily or through deception voluntarily have become biological robots and guinea pigs for this activity under the guise of national security.

The real consequences of microchip implantation (or with today's advanced hidden technology, using only microwave radiation for mind control), are totally hidden from the public.

How many know the real dangers of microwaves through mobile phones? How many believe the disinformation that microwave radiation is not causing health problems? The economic issues in the mobile-phone industry are enormous. Therefore, health issues are deliberately brushed aside.

However, the same thing is inevitable in the future as with the tobacco industry. When economic compensation for health damages becomes big enough, as in the tobacco industry, health hazards will be admitted and users are then responsible for their tobacco-related illnesses.

Today, already about 50% of Finns, Swedes and Norwegians use mobile phones, especially the young population.

Mobile phones used in mind control was a brilliant idea. Military and police agencies can follow every user, influence their thoughts through microwaves, cause healthy people to hear voices in their heads and if needed burn their brains in a second by increasing the current 20,000 times.

That probably happened to the Chechen leader General Dudayev who died talking to a mobile phone.

Heating effect of tissues with the speed of light is a known effect of high power microwave and electromagnetic pulse weapons.

According to Navy studies they also cause fatigue states, depression, insomnia, aggressiveness, long and especially short-term memory loss, short catatonic states, cataracts, leukaemia, cancer, heart attacks, brain tumours and so forth.

Alteration of behaviour and attitudes has been demonstrated as well.

Dr. Ross Adey has found out that by using 0.75 milliwatt per square centimetre intensity of a pulse modulated microwave at a frequency of 450 MHz it is possible to control ALL aspects of human behaviour!

Microwave radiation excites the hydrogen bond in the cells and can interfere with meiosis, which leads to tumours.

All our emotions, moods, and thoughts have a specific brain frequency which has been catalogued. If these records fall into the wrong hands, our behaviour and attitudes can be manipulated by persons whose ethics and morals are not in our best interest.

Both military and intelligence agencies have been infiltrated with such persons. The Director of the Swiss Secret Service had to resign in September 1999 because of his agency's involvement in illegal arms deals and a plan to create an ORGANISATION within the legal Secret Service.

This globally infiltrated organisation has 'octopus type' activities in all major intelligence services in the world, working together with the Mafia and terrorists. It has recruited people from all important government institutions, state and local administrations.

It owns Star Wars technology which is used against military and civilian populations, claiming it is 'non-lethal' weaponry.

'Down and out' people, jobless, freed prisoners, mental outpatients, students and orphans are trained by this organisation to harass, follow, and torture innocent people, who for whatever reason have been put on the organisation's hit list. They are ALREADY in every apartment block!

Deception is the name of the game, so recruits are told untrue sinister stories of their victims to keep them motivated. They have a military order and get rewarded for their evil actions, which include Satanism, and symbols and yellow-orange-black colours. However, fresh recruits must wear pink – and the highest elite wears yellow ties with dark suits. Even dashes of yellow or orange in their ties may signal their recruitment as well as yellow shirts or other objects with that colour for signalling.

Too many world leaders fit into this signalling. However, it is quite possible they are only used as fronts for this global organisation without any knowledge of its criminal activity in the field against innocent people. Mass media and big industry are also infiltrated.

Who are the targets?

Experimentation with soldiers and prisoners may continue, as well as handicapped children, mental patients, homosexuals and single women. They are still experimental guinea pigs for electronic and chemical warfare. But today ANYONE can become a target, even those who invented the system.

Researchers who find out about this secret radiation of the population become targets themselves.

The U.S. Senate discussed the issue on January 22, 1997. The U.S. Air Force's 'Commando Solo' aircraft have been used to send subliminal radio-frequency messages to manipulate even the minds of foreign nations in their elections. Haiti and Bosnia are a couple of recent examples.

In July 1994 the U.S. Department of Defense proposed the use of 'non-lethal' weapons against anyone engaged in activities the DoD opposes.

Thus opposing political views, economic competitors, counterculture individuals and so forth can be beamed to sickness or death.

The Psychiatric Diagnostic Statistical Manual (DSM) for mental disorders has been a brilliant cover up operation in 18 languages to hide the atrocities of military and intelligence agencies' actions towards their targets.

THE MANUAL LISTS ALL MIND CONTROL ACTIONS AS SIGNS OF PARANOID SCHIZOPHRENIA.

If a target is under surveillance with modern technology via TV, radio, telephone, loudspeakers, lasers, microwaves, poisoned with mind altering drugs via air ducts, giving familiar smells which cause headache, nausea and so forth, if he claims his clothes are poisoned, his food or tap water as well – all medical schools teach their students that the person is paranoid, ESPECIALLY if he believes intelligence agencies are behind it all.

Never is the medical profession told that these are routine actions all over the world by intelligence agencies against their targets. Thus, victims of mind control are falsely considered mentally ill and get no help since they are not believed and their suffering is doubled by ignorant health professionals.

The unethical abuses of power by individuals in charge of biomedical telemetry are incomprehensible to normal people.

The goal of mind control is to program an individual to carry out any mission of espionage or assassination even against their will and self preservation instinct and to control the absolute behaviour and thought patterns of the individual.

The purpose of mind control is to disrupt memory, discredit people through aberrant behaviour, to make them insane or to commit suicide or murder.

How is it possible that this technology is not stopped by political top authorities?

They themselves will also be targets someday, a fact they have not always realised. How much are they involved?

This year the 1999 European Parliament in 'Resolution on Environment, Security, and Foreign Policy', in paragraphs 26, 27, and 30 calls for 'non-lethal' weapons technology and development of new arms strategies to be covered and regulated by international conventions.

Also, it calls for an international convention introducing a GLOBAL BAN on all developments and deployments of weapons which might enable ANY FORM OF MANIPULATION OF HUMAN BEINGS.

Project HAARP in Alaska is a global concern, and calls for its legal, ecological, and ethical implications to be examined by an international independent body before any further research and testing.

It is possible that the USA will ignore those resolutions. The dangers of 'non-lethal' mind control weapons were already revealed in an expert meeting of the International Committee of the Red Cross in Geneva, in July 1994.

Only increased public awareness of the microchip implants, their frightful consequences to privacy by influencing of individuals' thoughts and actions, causing people to become biological robots with physical and emotional pain whenever the supercomputer technician so wishes, is enough reason to refuse to take the chip into your body for whatever reason.

It is the biggest threat to humanity and the most sinister plan to enslave the human race forever.

If you have a choice and want to remain a normal human being with privacy, do not have your children nor yourself implanted with a DNA microchip. Otherwise your vision, hearing, sensing, thoughts, dreams and subconscious will be influenced by an outsider, who does not have your best interests in mind.

MICROWAVE MIND CONTROL WITH 'NON-LETHAL' WEAPONS IS THE BIGGEST CRIME IN THE HISTORY OF MANKIND AGAINST THE POPULATION OF PLANET EARTH. IT MUST BE STOPPED BY ALL PEOPLES OF THIS GLOBE.

PENTAGON'S Brain SYSTEM

by Dr. Rauni Kilde, 2014

One of the reasons why remote control of the brain is unknown for the public is that it is listed among military secrets. It was something that the leading U.S. politician Dennis J. Kucinich experienced when he, in the Congress tried to regulate the U.S. international supercomputer control system. That which uses radiation to influence whole nations, both presidents and the man walking down the street, no matter where in the world he is.

Congressman Kucinich presented the bill H.R. 2977 on October 2, 2001, and stated: "By using land based, sea based and space based systems, with electromagnetic, psychotronic, sound, laser or other energies directed at individual persons or targeted population for the purpose of information war, mood management, or mind control ... any biological function or brain process can be directed. With these invisible systems anything from civil war to the modeling of individuals can be engineered."

But Kucinich's law proposal was scrutinised by the military and it wasn't allowed to progress. What was called for military secrets could not be presented in a Bill in the Congress.

One should also be aware that satellite systems can be used to change the weather, harvests and any other biological process in nature or in human beings and that was also disclosed.

The bill included the notion 'exotic weapon systems', and Kucinich described them as: "The term exotic weapon systems include weapons to damage the space or the natural eco system, the ionic sphere or the upper atmosphere, or the climate with the aim to induce destruction for an exposed population or a specific region on the earth, or in space."

It might be a great surprise to learn that the U.S. is involved in an unseen war against nations and bringing about destruction in different regions on the Earth. These processes of destruction can influence a nation's harvests, climate, the health of people, its mentality or mood or any other desired factor or variable.

But there were further military secrets exposed forcing Kucinich to withdraw the bill. This was some years before the first big tsunami in our time and Kucinich mentioned that both earthquakes and tsunamis could be generated by ray weapons and suggested that it must be prohibited to affect the Earth's tectonic system. It is when these eco systems in the Earth' crust weaken that the most damaging earthquakes and tsunamis occur.

The US, as well as other superpowers, started to develop these systems long before any satellite was launched. From the 1980s the U.S. Air Force's satellites were radiating the entire Earth with the frequencies 137 and 138 MHz. This still goes on day and night, and even though the frequencies might have shifted to higher wavelengths it's a type of brainwashing, an aggression generating stimuli all life on Earth is subjected to.

The U.S. Air Force published in 1996 a report with the title: 'Information Operations – A New War Fighting Capability'. Brain system's applications were discussed under the concept 'human-computer systems', and it was declared that supercomputers and bio-technology offered an interaction where all desired information can be retrieved. "The human-computer systems integration is a vital lead in the final technological area. Human systems and bio-technology offer the potential to create a seamless flow of information between human and computer"

Further down in the document it was mentioned that the controller could connect his brain to other people or sources regardless of geographic location. "Mastering these technologies will allow users to select information for direct input into their brains."

All this is done via the most advanced surveillance system ever created and is challenging everyone's integrity and security. Supercomputers can supersede people's own right to live with their own brain functions, behaviour or mood.

THE EU'S Brain Project

by Dr. Rauni Kilde

During the 50 years since the brain programme with behaviour technology was initiated, a lot of protests have occurred, details of which have not yet been published in mass media.

One of the best came a few years ago from the European Commission's Ethical Board (EGE), chaired by Swedish professor Goran Hermerén. They issued 'Ethical Aspects of ICT-implants in the Human Body', 16 March 2005. (ICT stands for Information-Communication-Technology and includes everything from electrodes to biochips, implanted by the Health services.)

The declaration took up the abuse of human beings in medical research, for behavioural manipulation, brain experiments and control of people.

They asked what threat the military was against society, democracy, and human autonomy when these implants are in our brains and proceeded to give an idea of the intended scope: "Brain-computer interface or direct brain control takes information from the brain and externalises it How far can such implants be a threat to human autonomy particularly when they are implanted in our brains?"

The document asked: "How far can ICT implants give an individual, or a group, specific capabilities that could become a threat to society?"

Under the heading 'Implants for which special caution is necessary', they stated: "ICT implants influencing the nervous system and particularly the brain and thus influence the human identity as a species, as well as individual subjectivity and autonomy", and they requested the determining question that this changed our nature as human beings: "Contemporary society is confronted with changes that have to do with the anthropological essence of individuals," and raised the matter of whether we are extinct when implanted and without free will: "Does a human being cease to be such a 'being' in cases where some parts of his or her body – particularly the brain – are substituted and/or supplemented by ICT implants?"

This is the most totalitarian project to have ever been developed anywhere on Earth.

A couple of years ago, the British magazine, The Economist, published the article 'The Future of Mind Control' and said that the brain researchers and their uncontrolled projects were the greatest threat to humanity. "People already worry about genetics. They should worry about brain science too."

"Yet when it comes to neuroscience, no government or treaty stops anything. Ignoring a possibility does not make it go away. If asked to guess which group of scientists is most likely to be responsible, one day, for overturning the essential nature of humanity, most people might suggest geneticists. In fact, neuro technology poses a greater threat – and also a more immediate one"

When thoughts, perceptions and brain functions are no longer one's own, we have left the essence of human beings and become a kind of biological component of the state and those with power over us: "The use of ICT implants in order to have a remote control over the will of people should be strictly prohibited"

The Swedish Defense Research Institution declares in their programmes that their aim is to control people's cognitive functions for a life time. The New York Times has published three political editorials about the threat and demanded a public debate on the issue – editorials which most people have never heard of. In their latest one 'Control CIA Not Behavior' they saw it necessary to hold these state institutions responsible for their actions.

European Council expressed the obvious: "The unlimited freedom for some can be a danger to others' health and safety ... The freedom to use implants in bodies; that principle of freedom can collide with potentially negative social effects"

This is a state programme that far exceeds racism and all forms of totalitarian development. It is a policy with cannibalistic overtones, designed to transform both people and society; a state programme, the European Commission is responsible for – where our national defence institutions and security police exploit people on a large scale.

The EU Ethical Board argued that a public debate must occur and there is a need to neutralise the threat against our minds and lives.

Ethical aspects of ICT implants in the human body:

***Opinion presented to the Commission
by the European Group on Ethics***

MEMO/05/97, Brussels, 17 March 2005

The European Group on Ethics in Science and New Technologies (EGE), chaired by the Swedish philosopher, Göran Hermerén, adopted on 16 March 2005 Opinion N° 20 on the ethical aspects of information and communication technologies (ICT) implants in the human body and presented this to the Commission. The EGE is an independent, multidisciplinary and pluralist advisory group, which is composed of twelve members. Its role is to advise the European Commission on how ethical values should be taken into consideration in the regulation of scientific and technological developments.

At first sight ICT implants are ethically unproblematic if we think for instance about cardiac pacemakers. However, although particular ICT implants may be used to repair deficient bodily capabilities, others are ethically more problematic, particularly if such devices are accessible via digital networks. ICT implants, due to their network capability could be misused in several ways for all kinds of social surveillance or manipulation.

The idea of placing ICT devices 'under our skin' in order not just to repair but even to enhance human capabilities gives rise to science fiction visions with threat and/or benefit characteristics. However, in some cases, the implantation of microchips with the potential for individual and social forms of control is already taking place.

The intimate relation between bodily and psychic functions is basic to our personal identity. Neurosciences are developing very quickly. The brain implants developed to alleviate tremors in Parkinson's disease are only one example. They show that ICT implants may influence the nervous system and particularly the brain and thus human identity as a species as well as individual subjectivity and autonomy.

These are the essential reasons why ICT implants in the human body have large and important ethical consequences. Not surprisingly, the respect for human dignity has been the fundamental basis of EGE discussions of where the limits should be drawn for different applications of ICT implants.

As already mentioned, ICT implants can be used both for health and for non-medical purposes. Both types of implants clearly require informed consent. This information should not only concern possible benefits and health risks but also risks that such implants could be used to locate people and/or obtain access to information stored in these devices without the permission of the individuals in whom the devices are implanted.

Although the necessity for research can sometimes be questioned, new knowledge is essential for the development of individuals and societies. However, the freedom of research has to be restricted by respect for other important values and ethical principles. Nevertheless, the ethical notion of the inviolability of the human body should not be understood as a barrier against the advancement of science and technology but as a barrier against its possible misuse.

In its Opinion, the EGE makes the general point that non-medical applications of ICT implants are a potential threat to human dignity and democratic society.

Obviously, the principles of data protection need to be applied to this area, since data about the human body can be generated via such implants. The privacy and confidentiality of such data need to be guaranteed. The EGE stresses the importance that not only the individual has the right to protect his or her own personal data but that society should take care that online and surveillance systems, where they are permitted, should not become systems of untenable restriction or even negation of basic rights. This should be particularly considered in case such systems become part of health systems in which data is permanently or occasionally transmitted to other parties. The use of ICT implants in order to obtain remote control over the will of people should be strictly prohibited.

ICT implants could be used to enhance physical and mental capabilities. Efforts should be made to make sure that such ICT implants are not used to create a two class society or to increase the gap between the industrialized countries and the rest of the world.

Access to ICT implants for enhancement should only be for the purpose of bringing children or adults into the “normal” range for the population (normal meaning the conditions that generally prevail and that are not caused by genetic malfunction, disease or deficiency and lacking observable abnormalities), if they so wish and have given their informed consent. A second permissible purpose would be to improve health prospects, such as enhancing the immune system to be resistant to HIV for example. As for health purposes, access to ICT implants for enhancement purposes should be based on need rather than on economic resources or social position.

The EGE insists that surveillance applications of ICT implants may only be permitted if the legislator considers that there is an urgent and justified necessity in a democratic society and that there are no less intrusive methods. Nevertheless, the EGE does not favour such uses and considers that surveillance applications, under all circumstances, must be specified in legislation, and that surveillance procedures in individual cases should be approved and monitored by an independent court.

A broad social and political debate is needed as to what kind of applications should be accepted and legally approved, particularly concerning surveillance and enhancement. A precautionary approach is recommended by the EGE. The Member States and their national ethics councils have a responsibility to create conditions for education and constructive, well-informed debates in this area.

This field needs regulation. Currently, non-medical ICT implants in the human body are not explicitly covered by existing legislation, particularly in terms of privacy and data protection. In the EGE's view, implantable devices for medical purposes should be regulated in the same way as drugs when the medical goal is the same, particularly as such implants are only partly covered by Council Directive 90/385/EEC on the approximation of the laws of the Member States relating to active implantable medical devices. The EGE recommends that the European Commission should launch legislative initiatives in these areas of ICT implant applications.

*Love and Light,
Rauní*

The development of 'non-lethal' weapons continues to take place without regulation and public control, reaching an unchecked peak in 2021.

MarketsandMarkets

Directed Energy Weapons Market by Technology – 2021

The directed energy weapons market is projected to grow from USD 6.87 Billion in 2016 to USD 24.45 Billion by 2021, at a CAGR of 28.90% from 2016 to 2021. ... The directed energy weapons market has been analyzed primarily on the basis of technologies, including high energy laser, high power microwave, and particle beam through the period of 2016 to 2021, considering 2015 as the base year. ... The directed energy weapons market is a highly dynamic and has high growth potential for several reasons, such as the changing geo-political dynamics of the global economy as well as the increasing incidences of armed conflicts, violence, and terrorism, among others.

Defense News, March 15, 2021

Hypersonic and directed-energy weapons: Who has them, and who's winning the race in the Asia-Pacific?

MELBOURNE, Australia, ISLAMABAD, NEW DELHI, and WASHINGTON – A number of countries in the Asia-Pacific region are caught up in the global hypersonic and directed-energy weapons race, with these regional powers having either developed or publicly stated intentions to develop such technology. ...

The Defense Post, February 24, 2021

US Army Set to Make Quantum Leap With Ultra-Short Pulse Laser Technology

The US Army has begun soliciting developers to build a laser weapon system that emits an ultra-short burst of highly intense energy to destroy targets. New Scientist has reported that a prototype of the ultra-short pulse laser (USPL) system is expected to be ready by August 2022.

Multiple Ways of Destroying Targets

The new system will emit a terawatt (equivalent to a million megawatt) of energy in a brief burst of 200 femtoseconds (one quadrillionth of a second), compared to the High Energy Laser with Integrated Optical-dazzler and Surveillance, or HELIOS, that features a laser of around 60 kilowatts (one megawatt is equivalent to 1,000 kilowatts) of power.
