## TI | Targeted Individual

**This magazine builds on our previous *'Magazine XII | Cognitive Warfare.'***

To really grasp the possibilities of hybrid, cognitive warfare, you have to leave your ideas of what is technically possible far behind. Here, hidden in the shadows, a technology has developed that has been refined over decades, with huge budgets, in top-secret projects and in countless illegal human experiments. At the same time, the networks and structures have been expanded to apply such technology arbitrarily, without public control or legal consequences.

What weapons are used here? In which programmes were they developed and how do they actually work? What effect do they have on the human body and psyche? How far-reaching can/are they used? Who is in possession of such technology? What are their objectives?

In this magazine, TI's | Targeted Individuals, who have become targets of hybrid cognitive warfare, provide us with deep insights into how the highly sophisticated weapons technologies, programmes and structures operate.

However, the use of this warfare is not solely about eliminating individuals (whistleblowers, competitors, etc.) in an undetected and clandestine manner. The target is the ordinary citizen, entire populations. Are the events that have been unfolding before our eyes worldwide since 2020 hybrid, cognitive warfare in wild action, on a global level?! Is the objective to literally crush the (spiritual) backbone of all humanity, to subjugate it to the will of a small group of parasites, forever?!

As a TI who has painfully experienced the possibilities of the technology first hand, as well as the absolute contempt for humanity with which it is used, there is no doubt about it.

# DR. RAUNI KILDE'S WARNING TO HUMANITY

© *Insights of Dr. Rauni Kilde, TI*

*Former Chief Medical Officer of Northern Finland,  
Medical Doctor, Author, Activist, Political Insider*

*From her book, 'Bright Light on Black Shadows'  
published posthumously in 2015*

The elite has plans to get rid of 2/3 of the world's population with electro-magnetic warfare, chemical warfare, and psychological warfare.

Mind control, MK, is listed as a 'non-lethal weapon' by the military. In 2002, the United Nations Institute for Disarmament Research (UNIDIR) in Geneva, Switzerland, designated mind control as a weapon of mass destruction along with nuclear bombs. This technology links the brains of people via implanted microchips to satellites controlled by ground-based super-computers.

All the US military branches are involved in the development of the technology, in cooperation with civil institutions like the Department of Health, in what is known as the NEURAL NETWORK ASSOCIATION. At their 1991 conference, it was revealed that they submitted and endorsed over 1.000 projects in brain-computer technology at 350 medical centers, universities, etc.

The best way to control people without their knowledge is through mind control. According to the CIA Director in 1972, mind control means a world where every thought, emotion, observation, and need is controlled.

Cybernetics, full neurological control and communication, has been in use since the 1940s without the knowledge of the public. The objectives are behavior modification and influencing mental and bodily functions, processes, and emotions remotely through computer-satellite links.

Directed Energy (DE) weapons, mostly EMF (electromagnetic frequency) and acoustic weapons, act on the psyche and the body of human beings and all living creatures. They have been called by many names:

Psycho-physical weapons, weapons of information warfare, psychotronic weapons, cognitive weapons, neurological weapons, mind-invasive weapons, mind control and electronic harassment weapons, remote neural monitoring, active denial systems, weapons of electronic warfare, means of neuro-linguistic programming, means for behavior modification, means of influence technology, computerized brainwashing machines, devices to zombify people, means to induce mental and physical illness, means for hostile surveillance, people zappers, and weapons of mass destruction.

**The Swedish military research (FOI) declares in their report of activities that their goal is to direct the cognitive functions of people for a lifetime.**

On July 21, 1994, the U.S. Department of Defense (DOD) proposed that 'non-lethal' weapons be used against anyone engaged in activities that DOD opposed. That could include almost anyone. DOD's potential enemies may be counter-cultural individuals, those with opposing political viewpoints, economic competitors, biological undesirables, etc.

From my point of view, the uses of this new technology philosophically are comparable to and amount to the Biblical Fall of man, the eviction from paradise. The all-encompassing thought-reading and mind-influencing capacity (of this technology) divides man into two encampments: Those few 'God-like' people, who are allowed to use these means, and all others, whose freedom and free will is being taken away.

We have been very surprised to hear about school and shopping center shootings. How many realize that these are tests where mind control programming is used to create a human robot. The serial killer is himself a victim, being programmed to be an emotionless robot and following orders to kill. The real killers sit behind computers and send him electromagnetic beams to the brain.

The secret services and their sabotage and terror 'departments' are the biggest 'terrorists' in the world and work together with the mafia. That was the case even in World War II, as has been published decades ago.

More crimes against humanity have been committed under the shield of 'national security' than the people can ever know, possibly even more than the mafia.

**To label the (non-consensual) human experimentees, the victims of mind control, as paranoid-schizophrenic is a crime against humanity.**

## **DJ Welsh (Level 9 News):**

The **Final Report of the 2014 GEOINT** symposium, written by intelligence professionals regarding multi-INTElligence persistent surveillance – This is network centric warfare where each person is a human network node on the **Global Information Grid (GIG)**.

Global data collection is being accelerated on every level. As far as this network centric-Artificial Intelligence system is concerned, you will be reduced to the sum total of the data collected on you. And that is the end game in the quest to control more than 7 billion people on the planet – ‘Mastering the Human Domain.’

They’re collecting everything. Their customers are the proponents of global government. Their adversaries appear to be the unbridled masses of humanity.

This could also be considered gang stalking. From the perspective of intelligence and law enforcement agencies and corporations which use organized gang stalking as a secret and illegal weapon for subversion – the perfect operation in this context is one in which the target becomes progressively isolated, impoverished, emotionally degraded and eventually seeks what appears to be the only available outlet, suicide.

**The Force Management Model (developed by MITRE Corps.):** Government now perceives the American people as its greatest threat. Patriots will be classified as terrorists, and the terrorist government will be deemed patriots. PARKA can handle complex queries against large data dumps.

The **Jade Helm II** computer software is part of much a larger command and control system that goes beyond military applications. It's called GEOINT; It's global in scope – and everything regarding the internet, social platforms, etc. If something has the word smart in front of it, for example, smart grid, smart cities, smartphone, smart TV, smart appliances – all of these are plugged into the GIG (Geographic Information Grid).

**GEOINT** is a tool for the proponents of global government in order for them to cast a neural net over humanity.

**How do you control 7 billion people? If you control the environment, they live in, you can control them.**

GEOINT is a complete, all-encompassing Command and Control system. When people are used as physical geo-located nodes on a network on a human terrain system. How do you remove that? Individuals can be removed as nodes. Just disconnect them. Erase their data and eliminate their connectivity to the GIG. Remove their relationships, communications, and earnings capability.

#### **Where's the central point for data collection?**

The GIG (Geographic Information Grid) and these NSA data dump centers in Bluffdale, Utah. Threat assessment centers are global and an integral part of this program.

ABI (Activity Based Intelligence) gathered from open-source data (facebook, linkedin, internet, cloud computing, cloud storage) activities, transactions (physical and virtual), vulnerabilities and capabilities of individuals and groups across all domains of the operational environment. All collected data is geo-located to a specific spot on the earth and tied to you, the node.

**The concept of humanity being managed and enslaved by an elite technocratic society is no longer a future vision. The network centric global A.I. system for human command and control is here.**

A subheading in their document states: *“The process of sense making in complex human endeavors: This approach uses a set of cognitive constructs that translates tacit knowledge to the focal knowing of the objective world.”*

How are they accomplishing this? They are mapping your mind. They are creating these maps with all of the information that’s being collected on everyone regarding every aspect of their lives. The macro-cognition component of the system is the process of dissecting the human domain.

Jade II AI computer software – it’s all network topography to optimize communication and data transfers. Everything, communications, everything, is tied in to the GIG.

The software is being used now. Another command and control problem that this system is designed to handle is: *“The enemy has always been able to adapt to a rapidly changing environment to hide itself from exposure. In order to adapt itself to combat this problem, the kill chain had to be compressed from hours to seconds. The system removes the administrative delay in the kill chain. It has no moral compass, no empathy, or regrets.”* (It’s a computer program.)

*“The system is designed to achieve dominance in cyberspace, cyber-power and cyber-strategy. This capability will continue to evolve even though key technical, social, and information trends begin to stabilize. It will capitalize on social engineering for offensive military and civilian operations.”*

In other words, this is a technical approach to the (gang stalking) tactics employed in Nazi Germany by the Stasi, the Brown Shirts, and the SS. This is just a technological version of those social engineering tactics they used then.

*“It’s a self-organizing, vision-capable, expectation-capable, recognition-capable, situationally aware, emotionally intelligent, goal-oriented system. The system thinks, plans, and executes.”*

## NSA'S TOTALITARIAN GLOBALBULK DATA ACQUISITION **SPYING on Everyone**

© *Insights of William Binney, TI*

*NSA-Whistleblower*

NSA (National Security Agency) decided that with bulk acquisition of data, US citizens would be the first to have (all) their information collected. The rest of the world are now being treated like US citizens.

This falls back to the principles of totalitarianism and how dictators have operated down through the centuries. It's known what your people are doing and find the ones who are not conforming to what you want them to do and then get rid of them. And that's fundamentally what this process does.

It gives them that kind of knowledge about everyone in the country. And if you start to speak up about some issue or something you get noticed and they have all that data already assembled on you. And they simply go compile it and look at it and see how they can influence you to do what they would conceive to be the right thing. So that's how they use it against people. And you make sure that they know what you know about what they've got. So then they (the people) fear you and will conform to your wishes. And if they can't find anything on you specifically, but they can find something on somebody you care about, then they'll use that against you. These are standard KGB tactics also.

President Obama is fundamentally attacking all whistleblowers as much as he can. He has prosecuted more whistleblowers than the entire set of presidents before him. He wants to silence them. He's a constitutional lawyer, so he knows this is a direct violation of the constitution.

This goes back to Caesar Augustus. Anybody that opposed him – you needed to know about it first of all, and once that happened, they would disappear. The same was true of the Soviet Union or East Germany with the Stasi. If you said anything out of line, you ended up in jail or in a sanitarium or something or in a gulag somewhere. The same was true of the Nazis and the Gestapo and SS.

This is the way totalitarian states operate. This gathering knowledge about people and the entire population is a totalitarian procedure. This is the domestic threat that our Constitution and the oath of office we took was given to prevent. No other country in the world could have done to us what we have done to ourselves.

This is the time when all good Americans need to stand up and oppose this. These agencies are threatening what is fundamental to human rights everywhere. We have to ensure that we have some way of verifying and keeping these agencies in line.

# MONARCH IS THE NEW PHOENIX PROGRAM

*The MONARCH program is the military's weaponization of the CIA's top-secret MK-ULTRA (and) other mind control experiments and programs.*

© Excerpt from: Marshall Thomas,  
*MONARCH: The New Phoenix Program, (2007)*

The Vietnam War was the formative experience for a generation of CIA and military intelligence personnel involved in the Phoenix program. They viewed the military defeat in Vietnam as a betrayal on the home front, a loss of will by domestic political enemies, not a military failure against a nationalistic revolution fought as a guerilla war.

The Phoenix program, assassinating suspected VC (Vietcong) sympathizers in a systematic manner, worked well and is the blueprint for the current black operation (aka gang stalking) targeting thousands of loyal Americans using state of the art microwave and radio frequency radiation weapons. The motivation to suppress domestic dissidents and to assassinate loyal American opposition stems from the perception of dissent against the war as treason. This philosophy is stated very clearly in the 'Mind War' (1980) paper written by Col. Michael Aquino.

The Department of Defense has a huge stake in futuristic technology that kills by ionizing and non-ionizing radiation, leaving little or no trace. The indiscriminate killing of the Phoenix program continues on American soil.

The terms 'soft kill', 'slow kill', and 'silent kill' refer to the new way of killing the enemy in conflicts short of war and in small wars of the future. The counterinsurgency doctrine has now been applied to the home front so that the perceived betrayal of the military in Vietnam will not be repeated.

The generation of CIA and military intelligence led by Ted Shackley, Richard Helms, (CIA Director) William Casey, Maj. John Singlaub, Richard Secord, Maj. John B. Alexander, Col. Michael Aquino, Paul Vallilee and others have built the perfect beast, using selective assassination that leaves no trace. The ability to cull the human herd with 'silent kill' technology allows a few personalities to remake the entire society in their own image.

Extremely low frequency (ELF) technology slowly drives the target crazy with silent sound, similar to the CIA MK-ULTRA psychiatrist, Dr. Ewen Cameron's, 'psychic driving' technique, used to break down the target's personality. The new buzzwords at the Pentagon are 'synthetic telepathy' and 'psychotronics.'

Another means of attack on targets is the Smirnoff patent, that uses subliminal suggestion to manipulate human behavior. This patent was purchased by the remote viewing company, Psi Tech Corporation.

Military intelligence officers involved in developing these 'non-lethal' weapons also control Psi Tech. Emotional manipulation is accomplished using Dr. Michael Persinger's work to remotely project emotional states that the brain entrains or locks onto and emulates.

One can broadcast rage or fear at an individual target to manipulate and control them. As if these methods were not enough to torture and murder people, add to this nightmarish toolbox, active gang stalking. CIA-created cults and other cause-oriented groups are used by actively harassing them in public in neutralization techniques described in counterintelligence operations manuals that are aimed at enemy agents.

In the race to develop a new weapon, it has always been necessary to test it on human beings. Perfecting the latest weapons designed to kill slowly and silently as well as perfecting the process of controlling the human mind are no different. Once the weaponry has been perfected on these few thousand people, the same techniques will be applied en mass to the general population and then to humanity as a whole.

# TI'S (TARGETED INDIVIDUALS) AND OTHERS

© *Insights of Dr. Eric Karlstrom, TI*

*Webmaster: gangstalkingmindcontrolcults.com*

If you are a 'Targeted Individual' (TI) or as I prefer to call it 'Targeted Citizen' (TC), you have been secretly and extra-legally designated by unknown and unaccountable persons as an 'Enemy of the State.' The full resources of the State, including the civilian sector, are coordinated by the Department of Homeland Security (DHS) and the FBI to slowly, silently, and secretly torture, terrorize, and kill you.

In other words, the Federal-State bureaucracy collectively termed the 'Interagency', which includes the military, intelligence, paramilitary (police, private security and intelligence firms), academic, legal, and civilian sectors, is waging psychological, chemical, and electronic warfare against you. (See: *New World War; Revolutionary Methods for Political Control* by Mark M. Rich, 2011).

As 'Enemy of the State', you are a non-person, very much like the 'detainees' at Guantánamo Bay and the Palestinians. Your constitutionally guaranteed civil liberties and due process of law have been (illegally) stripped. You have been secretly enrolled in a highly covert program that intelligence services have developed over the past century to terrorize and eliminate political enemies, foreign spies, heads of state, journalists, 'dissidents', critics of government, activists, etc. Unbeknownst to you, your name probably appeared on a classified, secret blacklist, such as the 'Terrorism Watch List', before your targeting and torture began. Bottom line: Officially, you are now an 'it', a 'target', and no longer a legal person.

Rather, you are an (illegal) 'covert operation' to be executed by military, intelligence, civilian, and any number of non-governmental agencies on behalf of the State. You are a potential 'contract' for thousands of private security firms such as the FBI-spinoff InfraGard and the Israeli Mossad-spinoff Black Cube. These and other mercenary and organized crime groups partner with the U.S. government, FBI, DHS, CIA, police agencies and others to wage the phony 'war on terrorism' against you and millions of other innocent civilians worldwide.

You may also be a non-consensual human guinea pig in one or several of the innumerable CIA-DARPA-Pentagon-funded weapons-testing and mind control programs and experiments now being carried out secretly and globally which involve hundreds to thousands of neuroscience-psychology-biology-computer science departments at universities and medical facilities.

'Counter-terrorism' is an integral part of the 'National Security Enterprise', the 'Global War on Terrorism,' and the Pentagon's 'Fourth Generation Warfare'/'Revolution In Military Affairs' (RMA). Most 'targets' are innocent civilians who have been designated as 'enemies' to help justify the multi-trillion dollar 'National Security'-'Counter-terrorism' corporate-military-intelligence-police complex which drives the American economy as well as the global 'terrorism' economy (which also profits from arms and drugs sales, human trafficking, sex trafficking, child trafficking, etc.).

Since 9/11, some \$9 trillion dollars in federal funds has been transferred from social programs to the National Security Establishment and over \$6 trillion in federal funds have been squandered to prosecute foreign wars of aggression under the pretext of 'The War on Terrorism.' These wars primarily benefit (greater) Israel and the corporate-military complex.

Many Targeted Citizens (TCs) are unaware they are being targeted, tracked, and monitored via satellite and supercomputer and on-the-ground government and private security spies and community-based agents (CBA), informants, etc. They are unaware that their day-to-day activities are surveilled, manipulated, disrupted, and controlled by shadowy military special forces operatives and other government and private security agents, vigilantes, paid street thugs, and other 'useful idiots' and 'useful idiot groups.' They are unaware that hordes of mind and behavioral scientists at hundreds to thousands of universities and medical facilities are essential participants in these operations.

Regardless of his/her level of awareness, the TC's life, freedom, and sovereignty are disrupted, controlled, and effectively, stolen through these operations. **TCs now effectively inhabit an unreal, unsafe and false world, a virtual 'electronic concentration camp.'**

The invisible fence of this cage is comprised of lies, spies, 'surveillance role players', 'spotters', setups, covert ops, psyops, defamation campaigns, betrayal by friends and family, electronic assaults and manipulations, and scripted sabotage and street theater by strangers – all designed to psychologically break down the TC.

As noted, many TCs are also 'disposable subjects' in (CIA) MK-ULTRA-style 'terminal experiments' that involve torture and/or mind mapping/mind cloning from electromagnetic and neuro-weapons.

Similar techniques were deployed against civilian populations by the Soviet Cheka and KGB, Russian FSB, East German Stasi, CIA-MI6-NATO's Operation Gladio in Western Europe, FBI's COINTELPRO, CIA's MH-CHAOS and Phoenix Program, etc. Similar technologies were recently deployed against American and Canadian diplomats in Cuba. Luke Harding, journalist with *The Guardian*, describes his own targeting by the Russian FSB (Federal Security Service) in his book: *Mafia State (2011)*.

A 2003 Boston Globe article states that the Department of Homeland Security (DHS) plan is to recruit 100 million citizen-spies to fight the 'War on Terrorism.' Is it any wonder that unemployment in America today is at its lowest (3.9%) since 1969, when the FBI's secret COINTELPRO, the CIA's top-secret MH-CHAOS and Phoenix political spying/sabotage/murder programs and the CIA's MK-ULTRA mind control programs were in full swing? Is it any wonder that America is falling apart? Effectively, CIA-DOD-NSA-FBI-DHS, etc. are staging a covert civil war here.

# THE HUMAN BRAIN PROJECT

© *Insights of Robert Naeslund, TI*

*From a lecture on the Human Brain Project  
by Robert Naeslund*

The history of Cybernetics is the history of the human brain project. It was developed as a collaboration between Military Research Agencies and major hospitals in the world.

## **Brains can be stolen and raped. The authorities do it!**

On April 10, 1967, the *New York Times* editorial, *Push-Button People*, discussed the ongoing experiments and warned about the dangers of this technology. They also mentioned that probably there were countries in the world that had already planned to subjugate their people using this technique. Both the U.S. and Sweden were countries that had far-reaching plans to subjugate citizens beyond their knowledge in brain control systems.

The Phoenix Program in Vietnam in 1970 used this same brain technology to identify and mass murder 33,000 civilians who were identified, by the technology, as Vietcong sympathizers!

In 1977, the *New York Times* published 30 articles about the CIA's brain control systems. The most important thing that was brought into light was that this project already had begun in the late 1940s, and that they had built, with this technology, a state within a state.

From *New York Times* editorial, August 5, 1977: *Control CIA Not Behavior*

*“So we must add repugnant medical experimentation to the list of horror stories emerging from the CIA. It was no secret that the agency once hunted desperately for means to control human behavior. One objective was to program individuals so that they might do the agency’s bidding even to the point of ignoring such fundamental laws of human nature as self-preservation. We are not sufficiently schooled in ethics to know how this differs from murder. There is no substitute for also holding their senior officials ethically and legally responsible as individuals for all activities. Even at this late date the country should be told who sanctioned such projects and how.”*

A conference was held in 1986, March 13, about the issue of mind control at the Swedish Department of Justice. Swedish Justice Minister Sten Wickbon had invited some professors, researchers, and a few politicians.

One professor, Bengt Pernow, said that researchers from all over the world are coming to Sweden to experiment on humans because they don't have the right to do that in their own countries. Because we here in Sweden have less protection for our Human Rights than other nations.

Many of those that sit in the EU parliament also have their brains incorporated into the defense departments' supercomputer control systems. Of course, they become a type of puppet for the will of others.

**The European Commission's Ethical Board wrote (2005):**

*“Brain-computer interface (BCI) or direct brain control are communication technologies: they take information from the brain and externalize it. ... Contemporary society is confronted with changes that have to do with the anthropological essence of individuals. ... To what extent might this technology be misused by the military? The Member States and their ethics councils have a responsibility to create conditions for education and constructive, informed debates in this area.”*

Throughout the history of mankind, there has never existed anything more totalitarian. There has never been anything more anti-democratic. A dictatorship can never be greater than when its citizens' brains are linked to computer control.

The State has become a cannibal, a rapist who is eating its citizens. Transforming us into biological manipulable components.

What happened during over 60 years of brain experimentation? Which doctors, professors, what institutions have been involved in the most anti-democratic project that ever existed? By what kinds of methods has it been possible to keep it off the media and people's attention? What is the role of the medical corporations? They are involved. What does the government say?

FOI's (Sweden's DOD/DARPA) supercomputers must be turned off. We are all about to become the State's lab rats and chip-regulated behavior-skulls.

# BIO-ELECTROMAGNETIC WEAPONS: **THE ULTIMATE WEAPON**

© *Insights of Harlan Girard, TI*

*From: 'Bio-electromagnetic Weapons: The Ultimate Weapon' (Girard, 2007) and 'A Current US Program of Involuntary Human Experimentation' (2005)*

Electromagnetic weapons operate at the speed of light; they can kill, torture and enslave; but the public are largely unaware that they exist, because these weapons operate by stealth and leave no physical evidence.

Electromagnetic weapons have been tested on human beings since 1976. By widely dispersing the involuntary human test-subjects, and vehemently attacking their credibility, it has been possible for the United States to proceed with these human experiments unhindered by discussions or criticisms, let alone opposition.

This ultimate weapon system is currently being deployed in Iraq. The US Air Force and the Marine Corps refer to it as 'active denial technology', as if it were used purely for defense, but it is not.

There is only one electromagnetic spectrum. The US military has weaponized the non-ionizing radiation below the visible range, the microwaves and radio waves that are used in mobile phones and telecommunications. The US government has strenuously denied that there could be health hazards from non-ionizing electromagnetic radiation, both as a defense of the involuntary human research it has been conducting for many years but has not yet acknowledged, and to dissuade other countries from developing similar weapons.

In 1959, Saul B. Sells, a professor of social psychology at a minor US university submitted a proposal to the Central Intelligence Agency (CIA) to build for them the most sophisticated electroencephalography machine that would have an integral computational capacity to analyze and, hopefully, make sense of the brain waves it recorded. In other words, the professor proposed to make a machine that could tell the CIA what a person was thinking, whether or not the person wished to disclose that information.

The CIA approved the project in 1960, adding some library research with five objectives. The fifth objective of the research was, *'Techniques for Activating the Human Organism by Remote Electronic Means'*.

The entire assignment was thereafter known as MK-ULTRA subproject 119, MK-ULTRA being the CIA's notorious mind control program. It was based on the erroneous notion that the Soviets already possessed the means to control minds and the US had to catch up as rapidly as possible.

In 1973, Joseph C. Sharp, an experimental psychologist at Walter Reed Army Institute of Research performed an experiment that was pivotal to the development of the torture equipment being shipped to Iraq today. He had James Lin set up equipment in his laboratory which converted the shape of sound waves into microwave radiation that enabled him to hear himself vocalize the names of the numbers from one to ten in his head, by-passing the mechanism of his own ears. This particular experiment was never published but is mentioned in Lin's book, *'Microwave Auditory Effects and Applications'*, published in 1978.

The experiment has been confirmed in US Patent 6 587 729, 'Apparatus for Audibly Communicating Speech Using the Radio Frequency Hearing Effect'. This patent is for an improved version of the apparatus used in the 1973 laboratory experiment, issued on July 1, 2003, and assigned to the Secretary of the Air Force. It provides scientific evidence that it is possible to hear threatening voices in one's head without suffering from paranoid schizophrenia.

The equipment that produces synthetic telepathy is sometimes referred to as 'influence technology'. While voices and visions, daydreams and nightmares are the most astonishing manifestations of this weapon system, it is also capable of crippling the human subject by limiting his/her normal range of movement, causing acute pain the equivalent of major organ failure or even death, and interfering with normal functioning of any of the human senses.

**In other words, any of the tortures with which the words Guantánamo Bay have become synonymous can be achieved by remote, electronic means.**

When George Herbert Walker Bush became president (in 1989), the incidence of co-worker killings in the post offices became so great that the expression 'going postal' began to replace the commonly used expression of 'going crazy'. The killing of co-workers in other workplaces began to command more media attention too.

I estimate that the cost of imprisoning a human being in his/her own body and applying unremitting torture is US \$5.000.000 to \$10.000.000 a year.

By 'unremitting torture' I mean exactly that. Because there is no visible evidence left by this new torture equipment such as damage to the skin, it is possible to torture the involuntary human subjects for 24 hours a day, 365 days a year. This can be done and is being done even on Christmas and Easter.

**Torture is a labor-intensive business. What objective would justify this investment? Could it be something as insane as to rule the world by enslaving the democratic governments of the more populous countries?**

# **ELECTROMAGNETIC** NEURO-TELECOMMUNICATIONS **AND CYBERNETICS**

© *Insights of Dr. Rauni Kilde, TI*

*Poster Presentation presented at 33rd International Congress  
on Military Medicine, Helsinki, Finland, June 30, 2000,  
by Dr. Rauni Kilde*

In 1952, when electronic implants were placed in the brain and teeth for tracking, behavior and mind control, conditioning, programming, and covert operations, it became necessary to hide the technology, Electrical Stimulation of the Brain (ESB) and implants during surgery or abduction from the public because of the Nuremberg Code, which prohibits involuntary medical experimentation on humans.

The DSM (Diagnostic and Statistical Manual) for Psychiatry was created in 20 languages. Today, it lists the symptoms created by four methods used on unsuspecting targets (electronic, chemical, or bacteriological, and psychological warfare experiments) as signs of paranoid schizophrenia.

All medical schools teach that one is mentally ill if they hear voices in their heads, feel they are surveilled, poisoned, beamed with microwaves, listened to via radios, telephone, loudspeakers, or TV, feel that their thoughts are read and responded to by strangers, and if they experience paranormal phenomena. The alternative diagnosis that the individual is a victim of mind control is never taught. Neither is the fact that the technologies to create such symptoms have existed for 50 years without public knowledge.

The public is unaware, for example, that electrical activity of the visual cortex of a subject's brain can be mapped out from images of the subject's brain that appear on video monitors. Operatives see what the surveillance subjects' eyes are seeing. Visual memory can also be seen, and images can be inserted into the subject's brain while they are in REM sleep for programming purposes. Two-way electronic brain link-up is done by remotely monitoring audio/visual information while transmitting sound to the auditory cortex that bypasses the ears and transmitting faint images to the visual cortex that bypass the optic nerves and eyes.

Nanotechnology computers are a generation ahead of present academic computer technology. There has been a Signals Intelligence Network since 1940 in the USA. And the Russian 'Woodpecker' signal has been beamed against Americans since in the 1960s. In Moscow, Russia, high-frequency beams of radiation directed at the American Embassy caused malaise, irritability and extreme fatigue. These effects are not temporary and include cataracts, blood changes that induce heart attacks, malignancies, circulatory problems, and permanent deterioration of the nervous system.

Today, the sudden attack of flu symptoms (without virus) or epileptic attack can be remotely induced in electronic warfare and an 'amnesia beam' can be used to cause a sudden blank-out of memory of a target (Targeted Individual or TI) who is giving a public presentation.

The latest technology includes cloning of EEG (electroencephalograms) and isolating an emotional cluster signature. The frequency/amplitude cluster is synthesized, stored on another computer and each negative emotion (fear, shame, envy, terror, hate, indifference, despair, frustration, anger, jealousy, pity, angst, embarrassment, remorse, anxiety, rage, guilty, resentment, sadness, etc.) is properly tagged and then placed on the silent-sound carrier frequencies. These frequencies will silently trigger the same basic emotions in another human being.

According to a Defense Intelligence (DIA) report, '*Controlled Offensive Behavior*' (1972), the most bizarre threat is the 'Apport' technique, which is a form of astral projection where the 'energy body' is transported to a remote site, where it de-materializes an object, transports it back, and re-materializes it. In this form of psychotronic warfare, electromagnetic fields and Apport phenomena mentioned in the DIA report have caused PH objects to pass through solid walls. The goal may be to use neural resonance to suppress psychic abilities via EG microwaves of the general population, as in Project Tower conducted in 1990.

Neural degeneration and DNA resonance modification can be achieved with the cellular telephone system and ELF (extremely low frequency) modulation. The two types of modulation that are biologically important are pulsed modulation and amplitude modulation. Modulation is the secret of transmitting information by electromagnetic fields, mobile phones, and new street lamps with micro-processors at malls, parks, streets, metro stations, etc.

Silent sound technology used in the First Gulf War was very successful. Our brain has specific frequencies for each voluntary movement called 'preparatory sets'. Specific 'preparatory sets' are encoded on microwave beams. Paralysis can be achieved and missing time can be induced with RHIC and EDOM (Radio-hypnotic Intra-cerebral Control and Electronic Dissolution of Memory). These methods can be used when the UFO question is used as a testing ground for electronic warfare or programmed assassins. Dr. Ross Adey found out that 0.75 MW/cm<sup>2</sup> pulse intensities can be used to control all aspects of human behavior.

In the United Kingdom, police have been granted the exclusive use of the 450 MHz microwave range. Microwave phones cause the neurons to release calcium ions which make the user tired and irritable, and when stressed, prone to emotional outbursts. ELF signals can cause cancer by modifying the function of the RNA transferases so that amino acid sequences are scrambled and produce unnatural proteins.

The greatest threats to our privacy are synthetic telepathy and the ability to scan our brains and read our minds using maser beams from a distance. Synthetic telepathy detects the 15 Hz 5 milliwatt auditory cortex brain emissions that are linked with the excitation potentials in the brain that are associated with sub-vocalized thoughts.

New technology involving low frequency microwaves and RP can scan through walls and look inside people's bodies as well. This allows computer-controlled targeting of specific centers in the victim's brain even when he is walking inside the house. Microwave radiation excites the hydrogen bonds in the cell and can interfere with meiosis. This causes cell division to malfunction and leads to cancerous cells and hence, tumors.

The testing period of implanting certain groups of people (soldiers at war, prisoners, mental patients, handicapped children, the deaf and blind, single women, homosexuals, etc.) is over. Today, anyone can be targeted and plans to microchip and control the whole world population through brain-satellite- computer links are far advanced.

The Swedish State Report SOU 1972:47 reveals a lot and Director General, Jan Freese of Sweden's DATA INSPECTION for 13 years states that the elderly in Old People's Homes were targeted in the mid-1980s.

On July 21, 1994, the US Department of Defense (DOD) proposed that 'nonlethal' weapons be used against anyone engaged in activities that they opposed. That could include almost anything and anyone. Mind control technology is classified under 'non-lethal weapons'. DOD's potential enemies may be counter-culture individuals, those with opposing political views, economic or financial competitors, biological undesirables, etc.

There is evidence that some (civil-military gang stalking) organizations have moved against these people or groups, slandering, harassing, and even killing without adequate cause or sanction.

Secret neuro-telecommunication, cybernetics, and electronic warfare capabilities can lead to abuse by unethical people in positions of power.

**Globus 2** in Vardo, northern Norway, operating since 1999, and **HAARP** (High Active-Frequency Auroral Research Project) in Alaska are of great concern because of their long-distance capabilities to influence both global weather and the human mind and behavior.

# BIO-MEDICAL TELEMETRY

## **MIND CONTROL**

© *Insights of Robert Naeslund, TI*

Bio-medical telemetry has long been thought to be impossible by the majority of people and has been relegated to science fiction. The fact is that scientists developed this technology into reality at least thirty years ago and started experiments with unwitting people.

By means of two-way radio communication, called telemetry or remote control, one can send a wavelength round trip to a brain transmitter in a person's head. The wavelength streams through the brain and returns to a computer, where all aspects of a human being's life are uncovered and analyzed.

During the 1960s, brain transmitters as small as a half of a cigarette filter made it possible for doctors to implant them into unwitting patients during operations easily and without surgery via the nostrils.

To analyze an EEG in a computer instead of a printer gives a whole new perspective on what can be concluded. The receipt of mental manifestations as thoughts and visual impressions or feelings, behavior and psychological reactions can be continually registered. Bio-medical telemetry has made it possible for medical scientists and the state to observe the person deeper and more completely than what the individual can possibly do himself.

Through analysis and programmed computers, even affects and changes in a person's physical and mental status can be created.

Quotes from *'Physical Control of the Mind: Toward a Psycho-Civilized Society'* by professor J. Delgado (1966):

*"By electrical stimulation of specific cerebral structures, movements can be induced by radio command, hostility may appear or disappear, social hierarchy can be modified, sexual behavior may be changed, and memory, emotions, and the thinking process may be influenced by remote control."*

*"Transmitters have no batteries, are activated by radio, and can be used for life, so that the brain can be stimulated indefinitely."*

Quote from *'Bio-Medical Telemetry'* by Dr. Stuart Mackay:

*"The possibilities by bio-medical telemetry are limited only by the imagination of the investigator."*

From P.M. Persson, Swedish Defense Research Institution, FOA, 1965:

*"Distances were not a problem, since long wavelengths could travel globally at the speed of light. Liquid crystals which are injected directly into the bloodstream and fasten themselves to the brain have been developed in the last ten years. It works on the same principle as the usual transmitter and uses the same technology and contains the same possibilities. An essential part of biotelemetry encompasses the transmission of data. This occurs mostly with help from a surgically implanted transmitter. The technology has been developed quite extensively in medical research."*

From *Publishers Weekly's* review of *'The Mind Stealers'* by Samuel Chavkin:

*"Telemetry for the surveillance of every citizen is on the drawing boards. That mind control techniques could become standard equipment of government, prison and police departments is backed by a forceful documentation."*

# NEURO-ELECTROMAGNETIC **TELECOMMUNICATION**

© *Insights of Dr. Rauni Kilde, TI*

*Poster Presentation Abstract at a RCTIC Symposium on  
Mechanics of Memory and Memory Disorder, March 17-18, 2001  
by Dr. Rauni Kilde*

Biotelemetry, neurological communication and control methods have been used for decades and the mental and physical health effects after the year 2000 are discussed. The objectives of achieving behavior modification and influencing bodily and brain functions and mental and emotional processes remotely and wirelessly through COMPUTER-SATELLITE-LINKS have been achieved. Methods used in this research are literature surveys and experimentation.

The astronauts were implanted with microchips so all their body functions, feelings, thoughts, dreams and even subconscious could be continuously seen and monitored from earth.

Supercomputer screen of over 200 billion bits/sec override human thought of 5.000 bits/second, 152 micro millimeter diameter chips also create a computer generated visualization based upon the user request. They are usually situated in the cochleas or optic nerve or temporal frontal lobe or placed via endoscopic transsphenoidal pituitary surgery or subcutaneously.

During a checkout of the laser machine in DISCOVERY, it began eliminating pulses of 10 bits/second rate which is within the frequency of the human brain's alpha wave range. Microchips operate with a low frequency radio wave aimed at it through satellite, and the implanted person can be located anywhere. Two-way radio communication controls the subject.

**CONCLUSIONS:** The neuro-electromagnetic wireless control is successful technology and shows that microwaves can cause healthy persons to hear voices and motion, and emotions and behavior can be directed by electrical forces.

The European Parliament has in its Resolution on Environment, Security, and Foreign Policy (28 Jan. 1999) suggested it is necessary to introduce a global ban on all developments and deployments which might enable any form of manipulation of human beings. The RHIC/EDOM system (Radio-hypnotic Intra-cerebral Control and Electronic Dissolution of Memory) is of utmost importance today and is being used with military and intelligence operations in NATO countries.

# GLOBALIZING CIA NO-TOUCH TORTURE

© *Insights of Cheryl Welsh, Attorney, TI*

*From: 'Making Sense Of Mind Control and No-Touch Torture:  
In Contravention of Conventional Wisdom'  
by Cheryl Welsh*

The history of CIA torture runs parallel to CIA neuroscience-based mind control research and also CIA 'non-lethal' weapons research. This is important because mind control allegations include descriptions of techniques that sound like all three CIA programs. It is possible that the related cold war CIA 'no-touch' torture, 'non-lethal' weapons and neuroscience-based mind control programs have co-mingled for intelligence uses.

'Non-lethal' weapons are another outcome of CIA behavior control research. Steven Aftergood wrote about the initial stages of 'non-lethal' weapons in the September/October 1994 Bulletin of the *Atomic Scientists*:

*"Details about programs to develop so called 'non-lethal' weapons are slowly emerging from the U.S. government's secret 'black budget'. The concept of 'non-lethal' weapons is not new; the term appears in heavily-censored CIA documents dating from the 1960s."*

Dr. Barbara Hatch-Rosenberg described nonlethal weapons in *'Non-lethal weapons may violate treaties'* (on page 45):

*"Many of the 'non-lethal' weapons under consideration utilize infrasound or electromagnetic energy (including lasers, microwave or radio-frequency radiation, or visible light pulsed at brain-wave frequency) for their effects.*

*These weapons are said to cause temporarily or permanent blindingly, interference with mental processes, modification of behavior and emotional response, seizures, severe pain, dizziness, nausea and diarrhea, or disruption of internal organ functions in various other ways."*

In 'A Question of Torture: CIA Interrogation, From the Cold War to the War On Terror', Professor Alfred McCoy explained:

*"CIA Paradigm: In its clandestine journey across continents and decades, this distinctly American form of psychological torture would prove elusive, resilient, adaptable and devastatingly destructive, attributes that have allowed it to persist up to the present and into the future.*

**1. Elusive:** *Unlike its physical variant, psychological torture lacks clear signs of abuse and easily eludes detection, greatly complicating any investigation, prosecution, or attempt at prohibition.*

**2. Resilient:** *Psychological torture is shrouded in a scientific patina that appeals to policy makers and avoids the obvious physical brutality unpalatable to the modern public.*

**3. Adaptable:** *In forty years since its discovery, the Agency's psychological paradigm has proved surprisingly adaptable, with each sustained application producing innovations.*

**4. Destructive:** *Although seemingly less brutal than physical methods, the CIA's 'no touch' torture actually leaves searing psychological scars. Victims often need long treatment to recover from a trauma many experts consider more crippling than physical pain."*

These characteristics also apply to 'non-lethal' weapons and neuroscience-based mind control. All three are emerging state tools of the future and can neutralize the enemy by controlling the behavior of the enemy.

A 2005 book entitled, *'Torture, Does it Make Us Safer? Is It Ever OK?'* was co-published with Human Rights Watch. Some general reasons for why governments use torture as a state tool include the following.

Governments torture because it is a way to obtain coerced confessions. The confessions can be used for propaganda purposes. Torture serves a variety of state purposes: *"to terrorize certain elements of the population, to instill a climate of fear in the public more generally, and to break key leaders and members of these groups, uncovering their networks."* Another purpose of torture is to *"obtain intelligence by any means," "annihilate subversives,"* and *"eliminate the enemy."*

Neuroweapons include the CIA's still classified neuroscience-based mind control research, 'no touch' torture and non-lethal weapons. All three are emerging state tools of the future that can reliably neutralize the enemy psychologically or without killing. All are ideal for counterinsurgency warfare, psychological operations and intelligence operations. The characteristics of 'no touch' torture, non-lethal weapons and neuroscience-based mind control make them more inhumane than the atomic bomb.

# MIND CONTROL SYMPTOMS

© *Insights of Cheryl Welsh, TI and Ms. Soleilmavis*

**I. The addendum of Gloria Naylor's novel, 1996, includes this description of some of the most commonly reported mind control symptoms:**

“Victims are subjected to various kinds of harassment and torture, twenty-four hours a day, seven days a week, for years on end. Most believe that some type of technology can remotely track, target, and control every nerve in their bodies. Heart and respiration rate can speed up and slow down, and stomach and bowel functions are regulated. Illnesses and all types of pain can turn on and off in an instant. Microwave burns are reported.

Sleep deprivation is common and dreams are manipulated. Victims say, *"They (whoever is targeting them) can see through my eyes, what I see."* Sometimes victims describe seeing the images of projected holograms. Thoughts can be read. Most victims describe a phenomenon they call 'street theater'. For example, people around the victim have repeated verbatim, the victim's immediate thoughts, or harassive and personalized statements are repeated by strangers wherever the victim may go.

Emotions can be manipulated. Microwave hearing, known to be an unclassified military capability of creating voices in the head, is regularly reported. Implanted thoughts and visions are common, with repetitive themes that can include pedophilia, homophobia and degradation. Victims say it is like having a radio or TV in your head. Less frequently, remote and abusive sexual manipulation is reported. Almost all victims say repetitive behavior control techniques are used and include negative stimulus-response or feedback loops."

**II. From Cheryl Welsh: ‘*List of Mind Control Symptoms*’ (2003), from her Mindjustice Homepage.**

**The following are common Mind Control Symptoms:**

Microwave hearing, Transmission of specific commands into the subconscious, Visual disturbances, Visual hallucinations, Inject words/ numbers into the brain via electromagnetic radiation waves, Manipulation of emotions, Reading thoughts remotely, Causing pain to any nerve of the body.

Remote manipulation of human behavior from space, Harassment, Stress symptoms such as helicopters flying overhead, Seeing, as in a camera, through your eyes (i.e. to see what you see exactly), Control of sleep patterns.

Computer-brain interface, control and communication, Complex control of the brain such as retrieving memories, implanting personalities.

*In this article, Cheryl Welsh documents that each of these symptoms coincide with proven scientific capabilities.*

# WEAPONIZED BIOPHYSICS AND NEUROSCIENCE

© *Insights of Cheryl Welsh, TI*

*From: 'The Secret 1950s Discovery Of The Code of the Brain',  
by Cheryl Welsh (1998)*

Stanford University Professor, Dr. Karl Pribram stated in: *'Rethinking Neural Networks; Quantum Fields and Biological Data'* (1993) that:

**“Multiple Personality** – Personality is a consistent pattern of responses to stimuli and situations. In QND (Quantum Neural Dynamics), the personality of the stochastic filter is determined by the locally homotopic mappings of experience onto the neural domain and by the configuration of discontinuities between homotopic domains. A conscious train of thought consists of a well-formed wave packet propagating within the neural domain in response to the combination of inputs from a number of sources, including the sensory apparatus and the outputs of other domains at various levels of abstraction.

When the probability density corresponding to this wave packet produces an expectation that does not compare well with the actual ensemble of inputs, the result is a potential field gradient (or 'barrier', if it is sufficiently steep) that deflects the wave packet toward states associated with less prediction error. Suppose that when the network's personality is being formed, it experiences a deliberately consistent 'diabolical' training in which certain common experiences are interrupted with frustrating or painful intervention.

QND learning will encode the painful experience on the trajectory so that it will be properly predicted as a consequence of the prior experience. (Incidentally, QND learning models classical conditioning even though it is simple Hebbian, because of the causal dynamics of the Schroedinger equation.) Whenever the common experience subsequently occurs without the intervention of the diabolical agent, the extreme difference between the expected punishment and the benign experience drives the conscious wave packet away from the states where the pain was stored.

This 'avoidance' has two consequences, one obvious and the other subtle. The obvious effect is that the deflected wave packet will generate an altered behavior pattern. The subtle effect is that the neurons where the painful patterns are encoded will be prevented from receiving enough probability to allow the patterns to be corrected.

Now suppose that the diabolical training is 'extensive', both figuratively and literally. That is, suppose that it succeeds in placing other avoidance patterns into a geometry that surrounds and isolates a large cognitive domain from the rest of the neural network. Subsequently, wavepackets that form in that domain will be trapped there, and that domain will then develop a personality that is distinct from the personality of the exterior domain. But the entrapment is not permanent: Quantum tunneling provides a mechanism for penetration of the barrier, after which another distinct personality emerges."

*Note by Dr. Eric Karlstrom, TI,  
Webmaster:gangstalkingmindcontrolcults.com*

*One stated goal of the early CIA mind control programs, Bluebird, Artichoke, MK-ULTRA and others, was to create an 'exploitable alteration of personality', in other words, to create multiple personality disorder (MPD) now called dissociative identity disorder in human subjects, so that these subjects could be utilized as programmed assassins (the Manchurian candidate), sex slaves, couriers, super-spies, etc in intelligence operations (i.e., multiple personal).*

*Splitting of a normal whole personality into multiple sub-alter personalities that can be programmed for intelligence purposes generally requires application of trauma-based mind control techniques, such as extreme pain, rape, etc. to the subject.*

*Apparently, Dr. Karl Pribram's repeated reference to 'diabolical training' refers to trauma based mind control techniques (i.e. torture) applied to subjects remotely and electronically. In this manner, he is indicating that human subjects can be rendered programmable via electromagnetic means – and he is explaining how this occurs.*

*Fourthly, we can speculate that the psychological attacks, the street theatre attacks from surveillance role players in combination with the 'non-lethal' and neuroweapons attacks on 'targets' comprise this diabolical training trauma based mind control and are key elements in the strategy to remotely program 'targets' so that they become bio-robotized slaves, that is, 'assets' of the intelligence agencies.*

# THE ORGANIZATION

© *Insights of Dr. Rauni Kilde, TI*

*From her Book: 'Bright Light on Dark Shadows', 2015*

We are living in an era where everything is controlled by the elite and intelligence agencies and those opposing their tyranny are eliminated with mind controlled, micro-chipped patsies or false-flag suicide or accidents or induced illnesses.

The organization that rules the world today behind the scenes is the 'New World Order', Illuminati with the Star of David, CIA, FBI, British Intelligence, and their local lackeys.

**Their goal is the next generation as biological robots. And the middle class has to be eliminated.**

## **Who controls the USA and UK?**

Global secret government organization rules the world behind the scenes. Many things point to Jewish sources. Banking, political figureheads, Hollywood movies, TV, radio, press ownerships internationally. Parts of armies and intelligence organizations are recruited to 'secret government' with many high political figures from heads of state to big industry.

They run the world with tens of thousands of recruits who are their errand boys all over the world. High-ranking officers, judges, politicians, members of Parliaments, EU. Some members of intelligence services, police, commerce and ministries work for this organization along with their daily duties. Mafia is strongly involved, so is drug industry from South and North America – that is how they get their money to run the show. Arms sales, antique and art industry are among other money-making businesses.

They never run out of money; organized crime pays very well today. With legal corruption rings, they seldom get convicted – and always get out quickly when the media has lost interest in the case. The Organization is an alliance which can use nuclear arms privately, target airplanes with their unbelievable laser signal technology for testing totally unknown to the masses and mediocratic academic population. Evidence suggests they already went to the moon in the 1950s – but the general population is kept in the dark about the incredible technology that exists today. Occasionally some leaks are let out about technologies that have been secretly in use since the 1940s and 1950s.

These include man-made UFOs, optic fibers, laser guns, weekly travels to the moon, holographic projections, electromagnetic weapons and bio-telemetric methods – all of which are like Hebrew to the general population and uninformed academics. Those with cosmic top-secret security clearances can get information about today's technology – like the cloning of humans. In 1977, it took 14 months to clone a human; today, it is much faster. But Scandinavian scientists still believe it is impossible and will take another 20 years to develop.

It is a crime against humanity to keep this kind of information secret. Front organizations like the Bilderberg Group, the Trilateral Commission, the Council on Foreign Relations, the Club of Rome, the Committee of 300, etc. are only facades for the real controllers of the world. Members of these groups, with a few exceptions, have no idea of the criminality involved in the system they serve. Some, involved in drug trafficking through the intelligence organizations and mafia, can be considered the biggest criminals in the world – secretly of course. The mafia's activities are based on deception and continuous suspicion. Its international cooperation exists only in drug trafficking and it wants to remain invisible. However, it is, of course, interested in individual politicians, which can be pressured to cooperate.

The real 'secret government', 'THE ORGANIZATION', works on all levels of society and mass media and different political powers and organized crime. They have their men in every political party, in every important industry, community, state office, insurance company, hospital, post office, bank, church, department store, fire department, taxing organization and of course, the military and intelligence services and legal circles.

Small shop owners are recruited to observe their customers. Neighbors are recruited to spy on their friends, students and school-boys and -girls to spy on their teachers and classmates, etc. In Finland it was released that the STASI, the East German intelligence organization, had recruited university professors as its agents. Every level of society is covered – from the garbage man to the highest levels of government. There is absolutely no lack of resources! Huge drug money profits take care of that.

Intelligence agencies are involved in drug trafficking, the CIA being the biggest drug dealer in the world according to some intelligence sources.

Intelligence agencies infiltrate everything from left to right. From women's organizations to UFO groups to cults. They use terrorism, Satanism, sabotage, disinformation and media outlets. They recruit the fieldworkers, old pensioners, invalids, handicapped, wheelchair patients, teenagers, housewives, etc. for neighborhood espionage. No one suspects them until it is too late. Jobless workers, outpatients from mental hospitals, released prisoners, motorcycle gangs, immigrants, non-white races are recruited. They become soldiers for 'The Organization'. For their sabotage, threats, thefts, and psychological terror, they get promotions and points.

Victim's relatives, acquaintances and friends will be recruited to cooperate with intelligence services. This happens with the help of pressure and is generally not difficult.

Intelligence agencies activities or counter-intelligence activities against the immigrant, which is the target, last throughout his whole life.

Target groups are also military research, research in chemistry, rocket technology and computers, medical research, especially cancer research. Recruiting scientists goes the same way as with others. Material which is received this way is bought with money. There are also ideological reasons and also pressure can be used. Pressure can happen with infidelity, hidden homosexuality or with bribes which have been given. Threats against family and relatives make many bow down.

Intelligence services infiltrate also cultural life, e.g. journalists and authors. The meaning is to recruit persons who work also in other countries, persons who are there to form opinions.

# ON RECRUITS (PERPS)

© *Insights of Dr. Rauni Kilde, TI*

*From her Book: 'Bright Light on Black Shadows', 2015*

Recruits show their rank by greeting one another with hand signals. One finger placed on the temple indicates a soldier. Two fingers, three four, etc. show your status. They use military ranks, and the highest levels greet one another with Freemasonic hand signals. Female soldiers are much used.

Recruitment is often very easy: Money buys most of them. Otherwise, blackmail is used. They find out everything about a person who is a target, including everything about their childhood, school years, friends, and neighbors. Then they start spreading nasty rumors and lies, trying to make the person look ugly and paranoid. Fear recruits many. They use threats against the target's children, parents, and other family members. Some are recruited using the 'national security' ruse. These recruits are the most unfortunate when they gradually find out the truth that they must sabotage innocent people under the shield of 'national security.'

More crimes against humanity are committed under this 'national security' shield than people could possibly know. Possibly more than the mafia has ever done. But very few dare to speak out – they are efficiently silenced by the Organization. Often they are killed through accidents, 'suicides', poisoning, etc.

Deception is the name of the game. All the poor recruits are being deceived. When they agree to work for the Organization, they unknowingly give up their freedom and become targets for mind control and human experimentation with electromagnetic fields, gasses and chemicals. Their health will gradually deteriorate, and they won't know why. Loyalty to the Organization is everything: They can never get out and leave it alive. They have to have a criminal mindset from the beginning. Honest people cannot live their life by terrorizing innocent people – for 'national security' or whatever lie was fed to them in the beginning to get them hooked.

Recruits and soldiers have no idea why they have to sabotage their former friends and neighbors who have become targets. They must blindly obey. And they don't that 10 and even 20 other recruits are terrorizing the same targeted person constantly in different ways. Thus, they feel no guilt. They do not know that they are in fact involved in psychological warfare, in breaking down a person for possible suicide or even driving the person to murder. They just do their own little part and don't know anything about the whole picture.

Still, they are part of a potential murder group. They terrorize the targeted person's telephone and fax machine, call at all hours of the night, and hang up the phone when it is answered. They steal the target's mail: Recruits in post offices can steal, open and destroy both incoming and outgoing mail. Recruited neighbors who were friendly before become nasty and help isolated the targeted person.

They sabotage and terrorize, break all electrical appliances, cars, grass clippers, mopeds, etc. They steal electricity and their own telephone bills get billed to the targeted person's phone. So these crimes 'pay' for them from the very beginning of the process. And when they have thus shown loyalty to The Organization they don't realize that they have become criminals who, when they are no longer needed, can easily be disposed of in their weekly meetings in their 'safe houses.' So they can be condemned and eliminated whenever The Organization wishes. Their group of 3 (with a fourth leader) meets every week in a different houses to strengthen their 'brotherhood and sisterhood' and their criminality and loyalty to The Organization.

They train young girls for surveillance and sabotage. They even train children of the recruits for noise campaigns against their neighbor who is a target. Children are taught to play, laugh and make unusually loud noises to harass the targeted person. They are taught to jump on the floors, following from room to room the targeted person who lives downstairs. They are taught to say nasty things to the target and being only 3-4 years old, they don't, of course, understand how insulting their words (taught by recruited parents) can be.

*From: 'Targeted Individual As Lone Wolf Terrorist'*

*Introduction to the Op Catalyst website,  
now removed from the Internet*

I am what is called a 'Targeted Individual', or enemy of the state. Becoming an enemy of the state is quite easy: uncover a few of its crimes and criminal conspiracies; be as investigative and honest as you can be; and you'll be an enemy of the state quite quickly.

In my case, after some years of investigative research, I uncovered existing mysteries about my own life, while attracting the interest of government intelligence services and their secret police.

These government operations are clandestine – or secret or classified. Things a government calls secret are many times very illegal, and activities a government classifies are sometimes outright criminal. You can measure a government's illegality and criminality in the vast number of documents it conceals from public view.

Governments which target persons in the way they have targeted me are mafia-states. Meaning the government operates in secret as a highly-evolved mafia. The way a mafia targets people is by surrounding the target mostly with others connected to, or owned by, the mafia state. Informants, government employees, snitches, lackeys – and the reason for this is because you are of more value to the government than you are a physical threat.

In my case, I was targeted at a young age because of my artistic skills, observational abilities and computer programming knowledge for what the Canadian and American governments have been testing on me, which is a highly sophisticated wireless surveillance and an unbelievably advanced intelligence and military technology.

It goes under various names; I call it virtual telepathy or VT. It's called, 'remote neural monitoring and prompting', 'brain re-patterning', and 'EEG fingerprinting'. Basically, it's a way to wirelessly monitor anybody, using the body's biometric displacement field and also computer-interfacing the target's brain patterns. This transforms a target – that is, a responsive target – into a test subject for a super spy, soldier and super policing program.

Virtual telepathy (VT) is a bit of a parlor trick, being a combination of hands-free biometric surveillance and remotely-prompting the human target to receive and acknowledge these prompts. It may seem like telepathy, but it's only one-way. You are a targeted individual, with no formal affiliation to the government, its military, police or intelligence services. The reason for this is simple; this elaborately advanced surveillance technology and its clandestine handlers will drive you insane.

It is a weapon, and it is also the most powerful of weapons, being invisible. Imagine wearing a set of wireless earbuds or secret service ear-prompter, where you are receiving wireless radio instructions day and night, even in your sleep. To wake up, to go for a walk, to turn left, to turn right, to stop, to start, to nod 'yes' or shake your head 'no' – like an obedient soldier.

Now imagine receiving those instructions after taking off those physical headphones, and that these signals can reach your head wirelessly, anywhere you go, like a radio. You can understand why intelligence, military and police desire this immensely, as there are no communications which can be monitored or intercepted by a third party.

It is private, discrete and transmitted through an anonymous computer interface to the target's own brain fingerprint, which is theirs and theirs alone, exploiting the same wireless frequencies which are all around us.

Adapting to this technology requires isolating the target and destroying their life and sanity in a complete personality disintegration, thereby infiltrating their brain.

Canada has a history of this 'brain re-patterning', going back to the 1950s with the government and CIA-funded MK-Ultra program at McGill University (with Dr. E.Cameron).

Like every type of weapon, governments never stop advancing them. It took me a long time to adapt to the VT weapon I was (and am) subjected to – over ten years. It also involved treatment with anti-psychotics, so that I could both endure it and remain sane with undisturbed sleep.

The reality is that this weapons' development has been going on in various forms through the participation of the American, Canadian, Israeli, and British governments for quite some time, and they generally use prisoners; who are both helpless and constantly monitored in jail cells.

**These governments, all the way to the top, want virtually telepathic soldiers, spies and secret police, expanding the required wireless neural monitoring to global populations, whether they know about it or not.**

## FRANK HEILER

Frank Heiler is a self-taught artist, specializing in surrealist and horror art. He was born and raised in a small town in Southern New Jersey. He grew up around artists in his immediate family, which had a major influence on him as a child. He always had an innate drive to create, several years ago this began to manifest itself in dark, obsessively detailed ink drawings, and then shortly after, paintings of the same quality.

He often paints his subjects as if they are distorted and twisted by their darkest, deepest emotions, their very realities shifting and collapsing beneath them, altered by their own thoughts.
